#### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Algaecide 60 is used to control the growth of algae in swimming pools, exterior spas and whirlpools, and hot tubs. For maximum effectiveness, pools, spas, whirlpools and hot tubs containing heavy growth of algae should be cleaned prior to using Algaecide 60.

For pools having just visible algae growth, add an initial dose of 11 to 17 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning.

For treatment of freshly cleaned and filled pool, add initially 6 to 11 fluid ounces of Algaecide 60 per 10,000 gallons of water. Subsequent additions of 2 to 4 fluid ounces of this product per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools and hot tubs having just visible signs of algae growth require an initial dose of 1 to 2 fluid ounces of Algaecide 60 per 1,000 gallons of water. For treatment of freshly cleaned spas, whirlpools or hot tub, add initially 0.6 to 1.1 fluid ounces of Algaecide 60 per 1,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of this product should be made every 5 to 7 days after initial treatment for maintenance.

Algaecide 60 is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. Algaecide 60 can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix with concentrated dry or liquid chlorine products.
