

ALGAECIDE 60

Concentrated Algaecide
For Use In Swimming Pools

Active Ingredient:

Poly[oxyethylene(dimethylimino) ethylene-
(dimethylimino) ethylene dichloride]:..... 60%

Inert Ingredients:.....40%

Total:.....100%

This product contains 5.76 lbs. of active ingredient per gallon
and weighs 9.6 lbs. per gallon.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Algaecide 60 is used to control the growth of algae in swimming pools, exterior spas and whirlpools, and hot tubs. For maximum effectiveness, pools, spas, whirlpools and hot tubs containing heavy growth of algae should be cleaned prior to using Algaecide 60.

For pools having just visible algae growth, add an initial dose of 11 to 17 fluid ounces of this product per 10,000 gallons of water and remove settled algae debris by cleaning.

For treatment of freshly cleaned and filled pool, add initially 6 to 11 fluid ounces of Algaecide 60 per 10,000 gallons of water. Subsequent additions of 2 to 4 fluid ounces of this product per 10,000 gallons of water should be made every 5 to 7 days after initial treatment for maintenance.

Spas, whirlpools and hot tubs having just visible signs of algae growth require an initial dose of 1 to 2 fluid ounces of Algaecide 60 per 1,000 gallons of water. For treatment of freshly cleaned spas, whirlpools or hot tub, add initially 0.6 to 1.1 fluid ounces of Algaecide 60 per 1,000 gallons of water. Subsequent additions of 0.2 to 0.4 fluid ounces of this product should be made every 5 to 7 days after initial treatment for maintenance.

Algaecide 60 is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. Algaecide 60 can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix with concentrated dry or liquid chlorine products.

FOR WINTER ALGAE CONTROL

This product will prevent the growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 6 ½ to 13 ounces of this product per 10,000 gallons of water. For pools having some visible algae growth at the end of the swimming season, add 13 to 19 ounces of this product per 10,000 gallons of water. Distribute this product uniformly throughout the pool to ensure maximum effectiveness. If the pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

STORAGE AND DISPOSAL

Store in original container in a cool dry place. Do not reuse empty container. Wrap container and put in trash.
