

ALGAE PREVENTOR

**Prevents Algae Growth In
Swimming Pools**

Active Ingredient:

n-Alkyl (60% C₁₄, 30% C₁₆, 5% C₁₂, 5% C₁₈) dimethyl
benzyl ammonium chloride..... 49.8%
n-dialkyl (60% C₁₄, 30% C₁₆, 5% C₁₂, 5% C₁₈) methyl
benzyl ammonium chloride0.2%
Inert Ingredients:.....50.0%
Total:.....100.0%

Weight approximately 8 pounds per gallon.

**KEEP OUT OF REACH OF CHILDREN
DANGER**

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's instructions. Adjust pH to between 7.2-7.6. Add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Maintain sanitizer residual in accordance with label directions found on the sanitizer of choice. When using other products as outlined in directions for this product, always follow directions on those products.

Algae Preventor should be added along pool edges while filter and pump are in operation. Recirculation will ensure rapid dispersion. To provide time for even distribution in the pool water, bathers should wait a minimum of 15 minutes after product addition before entering the pool.

INITIAL APPLICATION (To a clean pool): Add 26 fluid ounces of Algae Preventor to each 50,000 gallons or ratio thereof. If algae growth is visible, apply the initial dose. Vacuum pool after 24 hours to remove dead algae. If algae is still visible repeat dose as necessary until pool is free of visible algae.

CONTINUED APPLICATION: Add 6 ½ fluid ounces of Algae Preventor in 50,000 gallons of water every 3-5 days or as needed to maintain 2 ppm active.

BOOSTER APPLICATIONS: Add 6 ½ fluid ounces of Algae Preventor in 50,000 gallons of water after a heavy or prolonged rainfall or when there is a heavy bathing load.

The above directions should be followed even when the pool is not in use.

Algae Preventor is compatible with many swimming pool chemicals and when used as directed it is not harmful to the metal, paint, plastic or tile surface of the swimming pool. Used as directed, Algae Preventor will help improve the appearance and cleanliness of the swimming pool by helping to inhibit the growth of unsightly algae. Algaecide Preventor requires no special equipment for treating swimming pool water. The correct use-dilution may be added directly to the pool in any spot, or added to the water-circulation equipment.

ENVIRONMENTAL HAZARDS

This product is toxic to fish.
