

<p>U.S. ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460</p> <p><b>NOTICE OF PESTICIDE:</b> <input checked="" type="checkbox"/> REGISTRATION <input type="checkbox"/> REREGISTRATION (Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</p>	<p>EPA REGISTRATION NO. <b>42177-48</b></p> <p>DATE OF ISSUANCE <b>13 JUL 1982</b></p> <p>TERM OF ISSUANCE</p> <p>NAME OF PESTICIDE PRODUCT <b>OLYMPIC CHLORINATOR CARTRIDGE</b></p>
<p>NAME AND ADDRESS OF REGISTRANT (Include ZIP code)</p> <p><b>YORK CHEMICAL CORPORATION 3309 E. Carpenter Pwy. Irving, TX 75062</b></p>	
<p>NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.</p>	
<p>On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.</p> <p>A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.</p> <p>Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.</p>	
<p>This registration notice is being issued in accordance with Section 3(c)(7)(A) of the FIFRA subject to the following conditions.</p> <p>(1) It is understood that you will submit and/or cite all data required for registration or re-registration of your product under Section 3(c)(5) of the FIFRA when the Agency requires all registrants of similar products to submit such data.</p> <p>(2) You will submit two copies of your finished printed labels complying with the requirements or revisions specified in the attachment to this registration notice. These labels must be submitted to the Agency before the product is released for shipment as required by PR Notice 82-2, of June 18, 1982.</p> <p>A stamped copy of the draft label is enclosed for your records. Your release of the product for shipment constitutes acceptance of these conditions. If the conditions are not complied with, the registration will be subject to cancellation in accordance with Section 6(e) of the FIFRA.</p>	
<p>Sincerely yours,</p> <p> Jeff Kempter Acting Product Manager #32</p> <p><input checked="" type="checkbox"/> ATTACHMENT IS APPLICABLE</p> <p>SIGNATURE OF APPROVING OFFICIAL: <b>DISINFECTANTS BRANCH</b> <b>Registration Division (TS-767c)</b></p> <p>DATE</p>	

**ATTACHMENT TO EPA REGISTRATION NOTICE**

**EPA Registration No. 42177-48 Date Issued 13 JUL 1987**

**Company Name YORK CHEMICAL CORPORATION**

**Product Name OLYMPIC CHLORINATOR CARTRIDGE**

**The following requirements or revisions apply to the label which was accepted with this registration notice:**

- 1. The registration number which has been assigned to this product must appear on the label as EPA Reg. No. 42177-48. This registration is being issued with the understanding that the derivative of cyanuric acid which is contained in this product is under scrutiny for potential adverse effects to human. There may be some regulatory actions directed against all registered products containing this chemical as an active ingredient at some time in the future.**
- 2. Delete the phrase, "or bury in a safe place" under the Storage and Disposal heading.**
- 3. Two copies of the finished printed labels, as defined in the A-79 enclosure, must be submitted to the Agency before the product is released for shipment to comply with FR Notice 82-2 of June 18, 1982.**
- 4. The finished printed labels must comply with the general labeling requirements of Section 162.10 of Title 40 of the Code of Federal Regulations. If the label does not satisfy these requirements it will be rejected.**

ACCEPTE  
AND COMMENTED  
In EPA Letter Dated

JUL 13 1987

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.  
42177-48

**OLYMPIC**

# CHLORINATOR CARTRIDGE

For use in erosion feeders.

ACTIVE INGREDIENT: Trichloro-s-Triazinetrione.....80.0%

INERT INGREDIENT.....11.0%

Available Chlorine 80.0%

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**POISON:** Corrosive. Causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Irritating to nose and throat. Avoid breathing dust. May cause burns to broken skin. Wear pants, shoes, and socks and protective clothing when handling. Wash hands after handling.

**FIRST AID (PRACTICAL TREATMENT):** If swallowed: Do not induce vomiting. If on skin: Wash with soap and water. If in eyes: Flush with water for at least 15 minutes. For eye contact: Flush with water for at least 15 minutes. For eye contact: Flush with water for at least 15 minutes. For eye contact: Flush with water for at least 15 minutes.

**HAZARDOUS REACTION:** Strong oxidizing agent. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases.

**HAZARDOUS REACTION:** Strong oxidizing agent. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases.

## SPECIAL PRECAUTIONS

1. This product is a powerful oxidizing agent. Keep away from heat, sparks, or open flames.
2. Do not mix this product with any other chemicals. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases. Do not mix with acids or bases.
3. When adding this product to a stream or body of water, do not add it directly to the water. Do not add it directly to the water. Do not add it directly to the water. Do not add it directly to the water.
4. Use this product as directed on the label. Do not use it in a way that is not intended. Do not use it in a way that is not intended. Do not use it in a way that is not intended. Do not use it in a way that is not intended.
5. If this product is used in a stream or body of water, do not add it directly to the water. Do not add it directly to the water. Do not add it directly to the water. Do not add it directly to the water.
6. This product is a powerful oxidizing agent. Do not mix it with acids or bases. Do not mix it with acids or bases. Do not mix it with acids or bases. Do not mix it with acids or bases.

EPA REG. NO. 42177-48  
EPA EST. NO. 42177-TX-1

amount of water in a pool. When adding this product to a stream or body of water, do not add it directly to the water. Do not add it directly to the water. Do not add it directly to the water. Do not add it directly to the water.

**DIRECTIONS FOR USE**  
REMOVE AND REUSE FOR FUTURE REFERENCE  
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**FOR USE IN 2-2 CHLORINATOR:**  
1. Adjust pool water to 7.2 to 7.6 pH level as determined by a test kit.

2. If the pool has not been stabilized, add stabilizer (cyanuric acid) according to instructions on the stabilizer label.

3. Select the appropriately rated sample on the lower side of the cartridge. According to the gallon capacity of your pool as determined by the chart below:

Approx. Gallons  
(in thousands) 10 15 20 25 30 35  
Number 1 2 3 4 5 6

4. Cut a 1/4" diameter hole in the sample attached from the short sleeve and slip out only completely the three vertical slanted tabs on the lower side of the cartridge.

5. Place the cartridge in the feeder.

6. After the cartridge has been in use for 24 hours, check the chlorine residual level. Chlorine residual should be checked frequently and always maintained between 1.0 and 1.5 ppm.

If the residual level is below 1.0 ppm, remove the cartridge and cover the appropriately rated hole with black electrical tape. Then, cut a new 1/4" diameter hole in the next higher sample (e.g., A to B). Reinsert the cartridge and test residual again after another 24 hours.

If the chlorine residual is above 1.5 ppm, remove the cartridge and cover the appropriately rated hole with black electrical tape. Then, cut a new 1/4" diameter hole in the next lower sample (e.g., E to D). Reinsert the cartridge and test residual again after another 24 hours.

**KEEP OUT OF  
REACH OF CHILDREN  
DANGER**

See first aid precautions.  
NET WEIGHT: 4 lbs. (1.81 kg.)

## FOR USE IN OLYMPIC OR ANTHONY FEEDERS:

1. Adjust pool water to 7.2 to 7.6 pH level as determined by a test kit.

2. If the pool has not been stabilized, add stabilizer (cyanuric acid) according to instructions on the stabilizer label.

3. Cut a 1/4" diameter hole in the sample indicated by the letter "X" on the side of the cartridge where the side and narrow portions of the cartridge converge. Slip out only completely the three vertical slanted tabs on the lower side of the cartridge.

4. To make the initial height setting of the cartridge in the feeder, select the number on the graduated scale on the side of the cartridge, according to the gallon capacity of your pool as determined by the chart below:

Approx. Gallons  
(in thousands) 10 15 20 25 30 35  
Number 1 2 3 4 5 6

5. Insert the cartridge into the feeder until the top of the feeder lip is aligned with the number on the graduated scale selected from the chart above. Then rotate the cartridge clockwise in the feeder until it stops—about a quarter of a revolution.

6. After the cartridge has been in use for 24 hours, check the chlorine residual level. Chlorine residual should be checked frequently and always maintained between 1.0 and 1.5 ppm.

If the residual level is below 1.0 ppm, readjust the height setting to the next higher number on the graduated scale (e.g., 3 to 4). The cartridge will now be positioned deeper in the feeder.

If the residual level is above 1.5 ppm, readjust the height setting to the next lower number on the graduated scale (e.g., 5 to 4). The cartridge will now be positioned higher in the feeder.

**NOTE:** The pH of the slow dissolving tablet is on the acid side and will tend to reduce the pH and alkalinity of the pool water. Proper pH should be maintained between 7.2 and 7.6 as determined by a test kit and by periodic additions of sodium carbonate or sodium bicarbonate.

## STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Keep contents and container dry and off wet floors. In case of discontinuation inside container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or deposit in approved landfill area, whichever is applicable.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.
