

U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Antimicrobials Division (7510W)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number: 42177-49
Date of Issuance: MAY 14 1998

Term of Issuance:

Name of Pesticide Product: Jack Frost Winter Shock

NOTICE OF PESTICIDE:
 Registration
 Reregistration

(Under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Alliance Packaging Inc.
109 Northpark Blvd., 4th Floor
Covington, LA 70433-5001

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

In the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. The Child Resistant Packaging is Required.
2. Include the word "Poison" and the skull and crossbones symbol immediately below the signal word "DANGER" on the front panel of the label.
3. Under the "Environmental Hazards" statement revise the first sentence to read: "This pesticide is toxic to fish and aquatic organisms".

4. Signature of Approving Official: Robert S. Brennis, PM 32

Date:

27

4. Revise the "Precautionary Statement" to read:

Fatal if inhaled. Corrosive. Causes irreversible eye damage or skin burns. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not breathe dust. Wear goggles or face shield. For handling activities, use dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C). Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash clothing before reuse.

5. Revise the "Statement of Practical Treatment" to read:

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting.

If on Skin: Wash with plenty of soap and water. Get medical attention.

If Inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

If in Eyes: Hold eyelids open and flush with steady, gentle stream of water for 15 minutes. Get medical attention.

6. The proposed label should contain a "Note to Physicians". Some suggested types of information include the following:

- technical information on symptomatology;
- use of supportive treatments to maintain life functions;
- medicine that will counteract the specific physiological effects of the pesticide;
- company telephone number to specific medical personnel who can provide specialized medical advice.

Probable mucosal damage may contraindicate the use of gastric lavage.

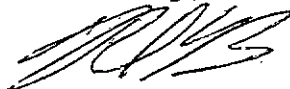

7. Change the Company Name and Address on the label.

344

page 3

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Sincerely,

Robert S. Brennis
Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7504C)

ACCEPTED
with COMMENTS
in EPA Letter Dated:
MAY 14 1998

Under the Federal Insecticide,
Fungicide, and Rodenticide Act as
amended, for the pesticide
under EPA Reg. No.

JACK FROST

WINTER SHOCK

Completely Soluble Highly Effective
Bactericide and Disinfectant

ACTIVE INGREDIENT: Lithium Hypochlorite 29%
INERT INGREDIENT:..... 71%
Available Chlorine 35%

KEEP OUT OF REACH OF CHILDREN DANGER

If swallowed: Drink promptly a large quantity of water.
Do not induce vomiting. Avoid alcohol. Get medical attention.
If in eyes: Flush with plenty of water
for 15 minutes. Get medical attention.
If on skin: Wash with plenty of soap and water.
Get medical attention if irritation persists.
See back panel for additional precautions.
NET WEIGHT: 2 lbs. (907 g.)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly Corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS— STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Used as directed, Winter Shock will provide a stable form of chlorine for your pool during the winter months while the pool is not in use. It is recommended that an adequate chlorine residual be maintained throughout the winter to control algae growth, prevent cloudy water, keep pool surfaces clean and make spring start-ups easier and less costly. Winter Shock may be used in any pool, but is especially recommended for vinyl-lined, painted, and fiberglass pools where bleaching of pool surfaces can be a problem.

- NOTE:** Re-entry into treated swimming pools/spa is prohibited above levels of 3 ppm of chlorine.
1. Thoroughly clean the pool. Brush and vacuum the walls and floor. Backwash the filter, skimmer and pump baskets.
 2. Test pH and adjust, if necessary, to 7.4—7.6. (It is recommended that a sample of your water be professionally analyzed prior to closing down your pool for the season.)
 3. With the pump in operation, add Winter Shock directly to the pool by broadcasting uniformly across the surface of the water. Add two pounds of Winter Shock per 10,000 gallons of water.
 4. Allow the water to circulate for at least 8 hours before adding additional chemicals.
 5. Add Winter Guard according to label instructions.
 6. Turn off the pump and heater. Drain the pump, heater, filter, plumbing, piping and all other related equipment. Add Freez • Gard or Polar Antifreeze according to label instructions for protection against freeze damage.
 7. Install the pool cover and fasten down securely.

NOTE: Check the pool water periodically during the winter. If algae begins to form or if the water does not freeze until late in the season, an additional application of Winter Shock may be necessary. Non-covered and mesh covered pools should receive at least one additional application of Winter Shock during the winter, preferably mid-season or sooner if necessary.

HOW TO CALCULATE POOL CAPACITY

SHAPE OF POOL	GALLONS OF WATER (Dimensions in feet)
Rectangular or Square	Average depth x average length x average width x 7.5
Circular or Oval w/ straight sides	Diameter x diameter x average depth x 5.9
Irregular	Consult pool builder

STORAGE AND DISPOSAL

Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.
