

ATTACHMENT TO EPA REGISTRATION NOTICE

EPA Registration No. 42177-50 Date Issued

13 AUG 1987

Company Name YORK CHEMICAL CORP.

Product Name OLYMPIC 1" TABS STABLIZED

The following requirements or revisions apply to the label which was accepted with this registration notice:

1. The registration number which has been assigned to this product must appear on the label as EPA Reg. No. 42177-50. This registration is being issued with the understanding that the derivative of cyanuric acid which is contained in this product is under scrutiny for potential adverse effects to human. There may be some regulatory actions directed against all registered products containing this chemical as an active ingredient at some time in the future.
2. Two copies of the finished printed labels, as defined in the A-79 enclosure, must be submitted to the Agency before the product is released for shipment to comply with PR Notice 82-2 of June 18, 1982.
3. The finished printed labels must comply with the general labeling requirements of Section 162.10 of Title 40 of the Code of Federal Regulations. If the label does not satisfy these requirements it will be rejected.

4. Remove "or bury in a safe place."

DANGER

CORROSIVE. CAUSES EYE DAMAGE—PROTECT EYES WHEN HANDLING. MAY BE HARMFUL OR FATAL IF SWALLOWED. MAY CAUSE CHEMICAL BURNS. CONTACT WITH OTHER MATERIALS MAY CAUSE FIRE OR EXPLOSION OR RESULT IN DANGEROUS PRESSURE, ESPECIALLY IF HEATED. CONTACT WITH WATER OR MOIST AIR LIBERATES IRRITATING AND HAZARDOUS GASES.

Do not get in eyes, on skin or on clothing. Avoid breathing dust or fumes. Wash thoroughly after handling.

FIRST AID: In case of contact immediately flush eyes or skin with plenty of water for at least 15 minutes. Call a physician. Remove contaminated clothing promptly and wash before reuse.

If swallowed, give large quantities of water. Give at least 1 ounce of milk of magnesia or aluminum hydroxide gel in an equal amount of water. If these are not available, give milk, white of 2 or 3 eggs or gelatin solution. Never give anything by mouth to an unconscious person. Call a physician.

SPILL: Sweep up and while providing adequate ventilation, flush away by flooding with water.

IN CASE OF FIRE: Use water spray to cool containers exposed to heat and flood with water to dilute material. Noxious fumes can be formed. Wear full protective clothing and self-contained breathing apparatus.

OLYMPIC

1" TABS

Stabilized • Slow Dis

ACTIVE INGREDIENT:

Trichloro-s-Triazinetrione

INERT INGREDIENTS:

Available Chlorine 80%

KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive—See first aid and precaution

NET WEIGHT: 25 lbs. (11.3 kg)

OLYMPIC

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR SWIMMING POOLS

1. Proper conditioning of pool water is necessary to insure maximum effectiveness of the 1" Tabs. Previously unconditioned pools should be treated with Olympic Stabilizer. Follow instructions on the label.

2. Adjust pool water pH to 7.2-7.6. Use pH Minus to lower pH and pH Plus to increase pH. Follow instructions on the label of the product used.

3. SUPERCHLORINATION is occasionally necessary to maintain a clean and algae free pool (see directions on label of Shock Treatment).

4. MAINTENANCE DOSE for every 10,000 gallons of water, put into AUTOMATIC CHLORINATOR 22 1" Tabs every 7-10 days. Check pool water frequently with a test kit and maintain 1.0-1.5 PPM chlorine residual and pH of 7.2-7.6.

5. During extremely hot weather and/or heavy bathing loads, additional dosage may be required. This can be achieved by adding 22 more tablets to the feeder for each 10,000 gallons of pool water. This provides 0.5 PPM additional chlorine dosage during the next 7 days. However, if immediate chlorine dosage is required, see directions on labels of Shock Treatment for quick adjustment of the residual chlorine to 1.1 PPM. After adjustment to 1.1 PPM residual chlorine by the addition of Shock, the 1" Tabs when used as directed, will maintain the residual chlorine level between 1.0 and 1.5 PPM under normal use conditions.

HOW TO CALCULATE POOL CAPACITY

SHAPE OF POOL GALLONS OF WATER (Dimensions in ft.)

Rectangular....Average depth X average length X average width X 7.5

Circular....Diameter X diameter X average depth X 5.9

Oval with straight sides....Full width X full length X average depth X 6.7

Irregular....Consult pool builder.

STORAGE AND DISPOSAL

Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Keep contents and container dry and off wet floors. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or ~~bury in a safe place.~~

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

GENERAL NOTES

Olympic 1" Tabs are a concentrated form of chlorine designed for the chlorination of swimming pools. 1" Tabs provide the acidity to lower the high pH of water which assists in increasing the effectiveness of residual chlorine.

POOLCIDE 60

AUG 18 1987

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

42389-12

ACTIVE INGREDIENT:

Poly[oxyethylene(dimethyliminio)ethylene-
(dimethyliminio)ethylene dichloride] 60.0 %

INERT INGREDIENT 40.0 %

This product contains 5.76 lb. of active ingredient per gallon and weighs
9.6 lb. per gallon.

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with these directions.

POOLCIDE 60 is used to control algae in swimming pools, exterior spas, whirlpools, hot tubs, decorative fountains, and ponds containing heavy growth of algae to using POOLCIDE 60.

For pools having just visible algae growth add an initial dose of POOLCIDE 60 per 10,000 gallons of water. For treatment of a fresh algae growth remove settled algae debris by cleaning. For treatment of a fresh algae growth add initially 6 to 11 fluid ounces of POOLCIDE 60 per 10,000 gallons of water. Subsequent additions of 2 to POOLCIDE 60 per 10,000 gallons of water should be made every 5 days after initial treatment for maintenance.

Spas, whirlpools, hot tubs, decorative fountains, and ponds having algae growth require an initial dose of 1 to POOLCIDE 60 per 1000 gallons of water. For cleaned spas, whirlpool, hot tub, decorative fountain, or pond, 1.1 fluid ounces of POOLCIDE 60 per 10,000 gallons of water. Subsequent additions of 0.2 to 0.4 POOLCIDE 60 should be made every 5 days for maintenance.

POOLCIDE 60 will prevent growth of algae during the off-season winter months when pools are not in use. For pools properly treated during the swimming season and are free of visible algae, add 10 fluid ounces of algicide per 10,000 gallons of water. If season pools have some visible algae growth, add 12 to 10,000 gallons. It is necessary that a uniform distribution of water and the pool be made for maximum effectiveness. If pool necessary to repeat the treatment one or more times during the season.

POOLCIDE 60 is compatible with chlorine products used to treat pools and spas and is effective at both low and high chlorine levels. POOLCIDE 60 can be used in pools containing chlorine chemicals and may reduce the amount of those chemicals. However, do not mix POOLCIDE 60 with other chlorine products.

STORAGE & DISPOSAL
STORAGE: Do not contaminate water, food, or feed. Keep container closed when not in use. Leaking or damaged container should be placed in a plastic bag and discarded in trash. Mop up all spills. All pesticides should be kept out of reach of children and pets.
DISPOSAL: Do not reuse empty container. Wrap container for disposal.
