NOTICE OF PESTICIDE REGISTRATION REREГИSTRATION <i>(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</i>	
NAME AND ADDRESS OF REGISTRANT (Include ZIP code)	
<div style="text-align: center;"> <div style="display: flex; justify-content: space-between; width: 80%;"> <div> <div style="border: 1px solid black; width: 100px; height: 100px; margin: 0 auto;"></div> </div> <div> <div style="border: 1px solid black; width: 100px; height: 100px; margin: 0 auto;"></div> </div> </div> <div style="text-align: center; margin-top: 20px;"> York Chemical Corporation 3309 E. Carpenter Fwy. Irving, TX 75062 </div> </div>	
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.	
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.	
A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.	
Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.	
<p>Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.</p> <p>Make the following labeling changes before you release the product for shipment:</p> <ol style="list-style-type: none"> 1. Revise the "Environment Hazards" statement to read: <p style="margin-left: 40px;"> "This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA." </p>

2

Following the sentence, "This pesticide is toxic to fish and aquatic organisms," you may instead use the text indicated in PR Notice 93-10 (copy enclosed), since that text will be required as indicated in that Notice.

2. Since this is a 100% repack of 748-209, the label active ingredient declaration must be revised to read 67%.

A stamped copy of the product label is enclosed for your records. Submit one copy of the final printed label before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

DANGER

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves and protective clothing when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Pool Chlor 65 is designed for rapid control of algae and for superchlorination at time of pool opening. These quick dissolving granules will destroy most strains of unsightly algae within 24 hours. Dead algae will come to rest at the pool floor. Remove by vacuuming frequently.

AT TIME OF POOL OPENING

Superchlorinate to satisfy initial chlorine demand of raw water. Apply one ounce of Pool Chlor 65 for each 1,000 gallons of water. After superchlorination, maintain chlorine residual at 1.0 to 1.5 ppm by using a suitable test kit. Test pH frequently. Always maintain pH between 7.2 and 7.6 as determined by test kit.

OLYMPIC POOL CHLOR

Disinfectant & Sanitizer
For the Treatment of Swimming Pools

ACTIVE INGREDIENT: Calcium Hypochlorite
INERT INGREDIENT:
Available Chlorine - 65%

KEEP OUT OF REACH OF CHILDREN

DANGER

STATEMENT OF PRACTICAL TREATMENT

If swallowed: Drink large amounts of water. DO NOT induce vomiting. Call or poison control center immediately.
If on skin: Brush off excess chemical and flush skin with water for 15 minutes. If irritation persists, get medical attention.
If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.
See other precautions on side panel.

REGULAR MAINTENANCE

In pools without stabilizer: If algae develops with resulting greenish color and slimy feeling, Pool Chlor 65 is necessary. Apply 2 ounces per 1,000 gallons of water by broadcasting granules directly across the surface of the pool. Before allowing swimmers to re-enter pool. Check chlorine residual using appropriate test kit. **VINYL POOLS:** Pre-dissolve Pool Chlor 65 in a plastic bucket of water, *adding the product to the water*. Stir, then let insoluble material settle to bottom of bucket. Pour liquid solution into deep end of pool. If algae persists, repeat the treatment.

NOTE Re-Entry into treated swimming pool is prohibited above levels of 3 ppm of chlorine.

Continue application of regular maintenance chlorine per directions on regular chlorine container label. Test pH frequently. Always maintain pH between 7.2 and 7.6

In pools with stabilizer: In pools stabilized with cyanuric acid or with chlorine concentrate, periodic superchlorination is necessary to control algae. Superchlorinate by adding one ounce of Pool Chlor 65 per 1,000 gallons of water every 7 days when the average pool temperature is above 80°F, or one ounce per 1,000 gallons every 14 days when the average pool water temperature is below 80°F. Follow other directions above.

STORAGE & DISPOSAL

Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry well ventilated area away from heat and open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage and disposal, or cleaning of equipment.
