

OLYMPIC GRANULAR ALGAE-OUT

**Concentrated Stabilized
Chlorinating Granules**

ACTIVE INGREDIENT:

Trichloro-s-Triazinetrione99.0%

INERT INGREDIENTS:1.0%

Available Chlorine 89%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

See additional precautions on back panel.

NET WEIGHT: 2 lbs. (907 gr.)

**DANGER RECD. 1A/CPP/DPD1
PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

STATEMENT OF PRACTICAL TREATMENT (FIRST AID): If swallowed: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately. If in eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention. If inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention. If on skin: Wash with plenty of soap and water. Get medical attention if irritation persists. Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Get medical attention.

PHYSICAL AND CHEMICAL HAZARD: Strong oxidizing agent. Do not use moist or damp utensils. Contamination with moisture, dirt, organic matter, or other chemicals, or any foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces, or other property in and around the pool will result in permanent bleaching of the color.

SPECIAL PRECAUTIONS

1. This product has a powerful chlorine odor. Hold away from face when opening to avoid breathing fumes.
2. Use this product as instructed on the label. Do not take advice from others or experiment by yourself.
3. This product, because of its potent formulation, can be dangerous if not used properly. Do not mix with any other chemicals. Doing so could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pail.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

INITIAL DOSAGE: The pH of the pool water should be adjusted to 7.4-7.6 before applying this product. For light algae growth, use 7 ounces per 10,000 gallons of water. For heavy algae growth, use 14 ounces per 10,000 gallons of water. Twelve to twenty-four hours after treatment, remove dead algae growth by brushing or scraping. Expose algae in cracks or wrinkles which may have been protected from the high chlorine residual. It will begin to reproduce again as the chlorine residual falls. If living algae is still visible after brushing, repeat treatment. Note: Re-entry into treated swimming pool is prohibited above levels of 3 ppm of chlorine. Use one of the following methods of application:

SKIMMER METHOD: Use this method to avoid bleaching vinyl liner, fiberglass or paint. Empty skimmer of all chemicals and debris. Make sure that pump and filter are on and that water is properly recirculating through skimmer. Remove any chemicals that may be in an in-line automatic feeder. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate. Do not allow this material to accumulate as gases generated may cause an explosion.

BROADCAST METHOD: Shut off filter pump, brush wall-clinging algae vigorously; then allow pool water to become stationary. Broadcast over surface of water where algae growth appears in the evening or when the pool is not in use. Use skimmer method to prevent bleaching of colored surfaces.

STORAGE AND DISPOSAL

STORAGE INSTRUCTIONS: Store in original container and place in locked storage area. Keep from freezing. Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Keep contents and container dry and off wet floors.

PESTICIDE DISPOSAL: In case of decomposition, isolate container, if possible and flood with large amounts of water to dissolve all material before discarding.

CONTAINER DISPOSAL: Do not reuse empty container (bottle, can, bucket). Wrap container and place in trash or dispose in an approved landfill area.

GENERAL: Consult Federal, state or local authorities for approved procedures such as limited burning.
