BACK PANEL

By following these simple instructions you can root hundreds of different varieties including African Violet, Carnation, Coleus, Fuchsia, Philodendron and Rose.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Prepare the rooting media.
2. Snip a cutting from the plant and moisten slightly -- shake off excess moisture.
3. Dip the bottom inch of the cutting into the powder. Shake off excess powder by tapping the cutting.
4. Plant the cutting in the prepared soil being careful not to rub the powder off.
5. Keep the planted cutting moist while rooting -- you will have new plants within a few weeks, depending upon the variety.

(Do not use on food crops or fruit trees.)

**STORAGE:** Store in original container, in a cool dry area (preferably locked) which is inaccessible to children and pets. Keep out of direct sunlight. **DISPOSAL:** Do not reuse empty container. Wrap container in several layers of newspaper and discard in trash.

**PRECAUTIONARY STATEMENTS**

**Environmental Hazards**

Do not apply directly to water or wetlands. Do not contaminate water when disposing of equipment washwater.
