DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DIRECTIONS FOR SWIMMING POOL CHLORINATION

For a new pool or for spring start up, superchlorinate with 1/2 ounce of this sodium hypochlorite solution for each 2500 gallons of water. This is equivalent to 5 ppm available chlorine by weight.

For Pool Maintenance:
A) Adjust pool water pH to 7.6 - 7.8 range and maintain.
B) Add manually or by a feeder device this sodium hypochlorite solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. Use 1/2 ounce of this sodium hypochlorite solution for each 6000 gallons of water which will provide 1.0 ppm available chlorine by weight. Frequently re-add to maintain a level of 1.0 ppm available chlorine will depend upon temperature and number of swimmers. Use test kit to make certain the pH and chlorine residual are in the proper range.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**

Dilute this sodium hypochlorite solution in the ratio of one part of this hypochlorite solution to 3 parts softened water. Mix sodium hypochlorite solution thoroughly and begin feeding of solution with a hypochlorite injector pump. Maintain a free available chlorine residual of at least 0.2 ppm and not less than 0.6 ppm throughout the distribution system, as determined by a DPD Chlorine Test Kit. Bacteriological sampling must be conducted at a frequent interval. This chlorine residual by the National Bureau of Primary Drinking Water Regulations. Test water regularly with a DPD Chlorine Test Kit.

Center for Disease Control, Health Department, Atlanta, Georgia

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using, rinse all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not wash overnight. Addition of one fluid ounce of this sodium hypochlorite solution per 4 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: This product regains strength with age. Use a chlorine test kit and rewash, if necessary, to obtain the required level of available chlorine.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and return to manufacturer. If discarded by placing in trash collection or burying in an approved landfill. Product in residue that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed. Storage, disposal or cleaning of equipment.
