IMPORTANT INFORMATION FOR YOU AND YOUR PET  
 PLEASE READ ENTIRE LABEL

**NATURE'S BEST:** Herbal Flea Collar will immediately begin to repel fleas on your pet and will also help prevent any new fleas from appearing later. Besides being very durable, it will leave your pet with a pleasant Herbal scent.

The use of a good Herbal flea killing shampoo is recommended before placing Nature's Best Collar on your pet. Be sure to regularly clean your pet's favorite areas and bedding. Collar needs replacement only when effectiveness diminishes. User surveys indicate that collar usually lasts about 30 days or longer.\*\*

By loving and caring for your pet naturally, you are also contributing to YOUR healthy environment. It pleases us to know you have made this commitment and exercised your freedom of choice by using the natural alternative, Nature's Best.

A very few animal's necks may become irritated by collar. This rarely occurs. Observe your pet's neck area shortly after placing collar on pet and, if red and irritated, remove collar. Nature's Best Collar is not affected if pet is out in the rain or gets wet.

**DIRECTIONS FOR USE:** Nature's Best Flea Collar should be buckled around your pet's neck. Generally a well fitted collar is one that when fastened, will slide tightly over your pet's head. Two or three inches should be left for adjustment if needed, cutting off any excess.\*

It is a violation of Federal Law to use this collar in a manner inconsistent with its labeling. EPA REG. NO. 42493-1 EPA EST. NO. 42493R701

**DISPOSAL:** Federal Law prohibits reuse of empty pouch. Wrap pouch, used collar and any excess pieces of collar and place in trash. Collar is intended for external use only, on pets, and is not to be taken internally. Do not let children play with collar.
