
DIRECTIONS FOR USE

For rapid control of roaches, ants, spiders, crickets, silverfish, centipedes, cheese mites, meal worms, grain beetles (confused flour beetles, red flour beetles) and weevils (granary weevils, rice weevils): Apply in a good spray adjusted to deliver a coarse wet spray at a rate of 1 gallon to 750 square feet of surface. Direct spray into locations where these insects are found, garbage containers, garbage chutes and rams, pest breaks and openings, pipe harbors, behind and beneath sinks, stoves, refrigerators, and dishwashers, baseboards, and around doors and windows. Direct spray and treat cracks and joints of entire floor, paying special attention to areas where evidence of insects is present.

In case of infested foods in cabinets, dispose of the infested material. Remove all contents and clean thoroughly. Spray interior surfaces of empty cabinets thoroughly. After spray has dried, cover shelves with paper or otherwise protect foods from direct contact with sprayed surfaces.

Repeat treatment if reinfestation occurs.

To kill flies, including fruit flies, mosquitoes, gnats, fly, moths, wasps and hornets, close windows and doors and shut off air circulating systems. Remove pets, birds and cover fish bowls before spraying. Apply as a fine mist using a commercial type sprayer. Thoroughly treat the area with special attention given to sources which attract these insects. Keep area closed for 15 minutes. Aerate treated area and ventilate before reoccupying.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Thoroughly wash exposed foods should be removed from area before treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. Do not apply directly to food, or in areas where food is exposed.

This product may be harmful if eaten. Do not pour down drains or sewers. Dispose of empty container in a sanitary landfill.
