Perfect Garden Beetle Bait fragrance lures adult beetles into Japanese beetle traps

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Remove the lid from the bait compartment of your Japanese Beetle Trap, and put in about 6 full tablespoons of bait. Replace the lid and hang the trap on a stand approximately 5 ft. above the ground. Leave about 8 ft. between the trap and the foliage you wish to protect. Use in open spaces near flower gardens, vegetable gardens, and orchards as well as on lawns and other turf, etc. Place in sunny location on the windward side of the planting. Several traps may be necessary for larger areas. For best results, add a little fresh bait every few days. In normal weather conditions, this bait will draw beetles for a period of 4 to 6 weeks.

TO DESTROY TRAPPED BEETLES: Unscrew the cage at the bottom of the trap, and empty the beetles into a container of hot water with detergent. Cold water mixed with a little kerosene may also be used. Within a few minutes, the beetles will become immobilized and die. To avoid objectionable odors, bury or dispose of dead beetles promptly.

STORAGE AND DISPOSAL DIRECTIONS

Store product in moderate temperature out of direct sunlight. Keep lid tightly closed to protect product from evaporation. Do not reuse empty container. Wrap container and put in the trash collection.
