DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling
For application with standard garden sprayer MIX 4 fl. oz. (8 TABLESPOONS) PER GALLON OF WATER
For application with a hose-end sprayer select a dial setting that will provide a dilution of one part
concentrate to twenty parts water. In areas with hard water, remove the wire screen from the nozzle of your
hose-end sprayer.

FOR MOSS IN LAWNS Moisten moss and grass before spraying or treat after rainfall. Spray infected
area thoroughly at the rate of approximately 1 gallon per 50 sq. ft. After 30 minutes, rinse sprayed area
lightly with clean water. Then withhold water for two days. Do not treat turf when temperature
exceeds 90°F

PERSISTENT MOSS GROWTH ON LAWNS is symptomatic of too much shade, acid soil and poor
drainage. If several sprayings do not reduce moss, problem it may be necessary to reduce shade, aerate
and lime the soil.

FOR MOSS IN PLANT CONTAINERS Moss Killer mixed as recommended can also be used to treat moss
and liverworts in plant containers but care must be taken to prevent the spray from coming in contact with
plant foliage. Discoloration of cryptogams normally takes 1 to 2 weeks, but may take longer under cool
conditions.

Do not apply Moss Killer to foliage of conifers or broadleaf plants

Product Code 7051

6051 B11.89

PRECAUTIONARY STATEMENTS

Hazards to humans and domestic animals
WARNING—Causes substantial but temporary eye irritation. Wear safety goggles when handling. In
case of eye contact, flush with plenty of water and get medical attention. If on skin, wash with plenty
of water. Harmful if swallowed. If swallowed, drink 1 or 2 glasses of milk and call a physician.
Environmental Hazards. Do not apply directly to water or wetlands. Do not contaminate water by
cleaning of equipment or disposal of wastes.
STORAGE & DISPOSAL
Store in cool place and keep container tightly sealed. For disposal of unused product, secure, wrap,
original container in several layers of newspaper and discard in trash. Do not reuse empty container.
Rinse thoroughly before discarding in trash.

EPA Reg. No. 42687-07
EPA Est. No. 907-TN-03, 4091-TN-03, 4091-CA-001

DIRECTIONS FOR USE

Mix one part concentrate with 20 parts water or approximately 6 fl. oz. (12 tablespoons) per gallon. Apply mixed spray at the rate of approximately one gallon per 100 sq. ft. of overgrown surface. For best results moisten area to be sprayed with fresh water before applying Moss & Algae Killer. Avoid spraying when precipitation is expected. Repeat treatment annually or at the outset of cryptogam recolonization. Discoloration of cryptogams takes longer under cool conditions. However, dead moss will gradually slough away; physical removal is not necessary. Moss & Algae Killer applied to the hardened bark of trees will remove moss and lichens. Do not apply to or allow overspray to contact foliage or green bark of conifers or broad-leaf plants. Do not use to control moss in lawns. Treated surfaces may be temporarily slippery.
