SHARPSHOOTER AND SAFER ARE REGISTERED TRADEMARKS OF SAFER INC

Safer's scientists have developed a unique and effective weed killer which is formulated from fatty acids derived from plant oils. Safer Inc. now provides products that you can use with confidence to control insects, diseases and weeds around your home.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT: SAFER® SHARPSHOOTER™ WEED AND GRASS KILLER IS A GENERAL HERBICIDE AND WILL DAMAGE OR DESTROY ANY VEGETATION WHICH IT CONTACTS. AVOID OVERSPRAY OR SPRAY DRIFT ONTO DESIRABLE LAWN GRASS, FLOWERS, VEGETABLES, GARDEN PLANTS, SHRUBS, OR TREES. IF DESIRED VEGETATION IS CONTACTED, WASH IMMEDIATELY WITH WATER. KEEP PEOPLE AND PETS OFF TREATED AREAS UNTIL DRY TO AVOID PRODUCT TRANSFER TO DESIRABLE VEGETATION.

Use product as provided. No dilution is required. Use for spot treatment of weeds. Ensure uniform and complete coverage of all types of unwanted vegetation. VISIBLE EFFECTS USUALLY OCCUR WITHIN FOUR HOURS. Do not apply during windy conditions that will carry spray onto desired vegetation. SHARPSHOOTER is a contact herbicide. Shield grass and desired plants carefully during use to avoid damage to these plants. The herbicidal effect of SHARPSHOOTER does not remain in the soil of treated areas so they can be seeded two days after treatment.

For best results, apply to weeds during early period of growth.

The speed at which SHARPSHOOTER works is affected by climatic conditions. For most rapid kill, apply in warm weather. Under some conditions tough weeds like Bermuda grass, Canada thistle, and bindweed will show signs of regrowth after several weeks. Should this occur, retreat with SHARPSHOOTER.

SHARPSHOOTER may cause a white residue on some types of brickwork or concrete. This residue will wear off after a few weeks.
