Subject: Label Notification(s) for Pesticide Registration Notices 2007-4 and 98-10  
1. Updated warranty statement

Dear Mr. Mongiovi:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 9, 2009 for:

**EPA Registration 42697-33**  
**EPA Registration 42697-17**

**Safer Brand Soap & Pyrethrum Ready-To-Use**  
**Safer Brand Garden Fungicide Ready-To-Use**

The Registration Division (RD) has conducted a review of this request for applicability under PR Notice 2007-4 and 98-10 and finds that the label changes requested falls within the scope of PR Notice 2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-5551.

Sincerely,

A handwritten signature in black ink, appearing to be "Linda Arrington".

General: Safer® Soap and Pyrethrum is a patented formula that utilizes Safer® Brand Insecticidal Soap to desiccate the cuticle of the insect, plus pyrethrins to attack the insect's nervous system. The combination of these ingredients is synergistic (the effect of the two ingredients together is greater than either used individually). The result is a more reliable insecticide with the benefit of immediate kill from pyrethrum.
