GENERAL:

Safer® Brand Insect Killer is a contact insecticide that provides rapid mortality of susceptible insects. Safer® Brand Insect Killer quickly penetrates the insect's body and disrupts the normal function of both cells and membranes. The net effect of this unique action is that the contents of the cells are lost and rapid death occurs. Safer® Brand Insect Killer is active only in the liquid state and only as a contact spray. No insecticidal activity should be expected once the solution has dried. As is common with most contact insecticides, Safer® Brand Insect Killer is effective on adult and immature stages of susceptible insects.

Safer® Brand Insect Killer is a pure soap consisting of 2.00% potassium salts of fatty acids manufactured by treating selected natural fatty acids with a potassium base. The other ingredients include a combination of water and alcohol, and contain no inorganic solvents.
