ENVIRONMENTAL HAZARDS

This pesticide may be toxic to fish, aquatic invertebrates and aquatic plants. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Unless otherwise directed in supplemental labeling, all applicable directions, restrictions, precautions and Conditions of Sale and Warranty are to be followed.

This labeling must be in the user's possession during application.

Grass Cut for Hay Use 1 to 4 pints per acre in sufficient water (3 to 5 gallons) by airplane or (10 to 100 gallons) by ground sprayer application to provide thorough coverage. Use higher application rate for White top, Canada thistle and other hard-to-kill weeds. Spray perennials in early bud to full bloom stage and regrowth in fall. Other weeds in spring or fall.

Precautions and Restrictions

- When using on Grass Cut for Hay there is a
- (1) 7 day pre-grazing interval for dairy cattle,
 - (2) 3 day pre-slaughter interval for meat animals
