ALBAUGH, INC.
VISKO-RHAP®
LOW VOLATILE 2DP

ACTIVE INGREDIENT:
Isooctyl ester of 2-(2,4-dichlorophenoxy) propionic acid*33.655%
INERT INGREDIENTS:.....66.65%
Total.....100.00%

*Equivalent to 24.6% of 2,4-DP acid or not less than 2.0 lbs. of 2,4-DP acid per gallon.

KEEP OUT OF REACH OF CHILDREN

CAUTION

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. Call a physician. Note to physician:
Aspiration hazard may contraindicate the use of gastric lavage.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention if
irritation persists.

IF IN EYES: Flush with plenty of water for 15 minutes. Get medical attention.

(See side panel for additional Precautionary Statements).

EPA Reg. No. 42750-18

EPA Est. No. 42545-MO-1

Manufactured by
ALBAUGH, INC.
Ankeny, Iowa 50021

PRECAUTIONARY STATEMENTS

CAUTION

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Wash thoroughly after handling. Harmful if inhaled. Avoid breathing spray mist. Remove contaminated clothing and wash before reuse. Do not apply this product in such a manner as to directly or through drift expose workers or other persons. The area being treated must be vacated by unprotected persons. May cause skin irritation.

ENVIRONMENTAL HAZARDS

Drift or run-off may adversely affect nontarget plants. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

Most cases of groundwater contamination involving phenoxy herbicides such as Visko-Rhap® Low Volatile 2DP have been associated with mixing/loading and disposal sites. Caution should be exercised when handling 2,4-DP pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing or transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with labeling.

REENTRY STATEMENT

Do not enter treated areas without protective clothing until sprays have dried. Protective clothing means, at least, a hat or other suitable head covering, a long-sleeved shirt and long-legged trousers or a coverall type garment (all of closely woven fabric covering the body including the arms and legs), shoes and socks. When handling this product, wear chemical resistant gloves. Wash nondisposable gloves thoroughly with soap and water before removing. If spills occur, collect the material and dispose of by following disposal instructions on this label.

Because certain states may require more restrictive reentry intervals for various crops treated with this product, consult our State Department of Agriculture for further information.

STORAGE AND DISPOSAL

Do not contaminate water, food, feed, seeds, fertilizer, insecticides or fungicides by transport, storage, disposal or cleaning of equipment. Open dumping is prohibited. Do not use or store near heat or open flame. Do not store near other pesticides or seeds. Do not reuse containers. Store at temperatures above 32°F. If stored below freezing, it may be necessary to warm to 40°F and agitate before using.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or environmental control agency, or the hazardous waste representative at the nearest EPA regional office for guidance.

CONTAINER DISPOSAL

METAL DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

PLASTIC CONTAINERS: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

NOTE: Do not mix with liquid fertilizers.

Visko-Rhap® formulations are designed to produce thick invert emulsions when used in the Two-Fluid Spray System. The formulation and water enter the spray system separately to be mixed in a special chamber as the spraying is performed.

For best performance dilute and mix 1 part of Visko-Rhap® Low Volatile 2DP with 1-3 parts of No. 2 fuel oil or kerosene before placing it in the supply tank.

The formulation and water **SHOULD NOT** be mixed before use.

If this product is to be applied through a bifluid nozzle, sodium bisulfate, water-conditioning agent, must be added at the rate of 2 pounds per 50 gallons of water.

This product when used as directed forms a thick invert emulsion that breaks up into large spray droplets, which are least likely to drift. However, minute quantities can cause injury by drift, and application conditions that permit drift of spray should be avoided. Do not allow this chemical or dilution of it to come in contact with susceptible broadleaf plants that are desirable such as cotton, soybeans, tomatoes, grapes, clover and other legumes, and ornamentals. Excessive amounts of this...

product in the soil may temporarily inhibit seed germination and all plant growth. Do not use the same spray equipment for other purposes where even trace amounts of this chemical may cause injury.

WHERE TO USE

VISKO-RHAP® Low Volatile 2DP will control Sand Sagebrush and Shinnery Oak. Best results are obtained when spraying is done while weeds are young and actively growing.

Application rates of to 1 pound per acre of 2,4-DP acid equivalent (1 to 2 quarts of formulation) are recommended depending on brush density and height. Spray to cover foliage of unwanted vegetation. Two successive applications spaced a year apart are recommended for Shinnery Oak.

Aerial Application: Fill water tank with fresh, clean water. Water temperature should not be less than 55°F. Add Visko-Rhap® Low Volatile 2DP herbicide to the formulation tank. Use orifices giving (formulation: water) ratio in the range of 1:3 to 1:9. Adjust pressure regulator on the pumps to suit the spray job being done, but do not exceed 35 p.s.i. Application rate: to 1 pound per acre of 2,4-DP acid equivalent (1 to 2 quarts of formulation).

DO NOT USE AROUND HOME OR RECREATION AREAS.

Do not apply this product on lawns. Legumes such as White Clover are susceptible and may be severely damaged or killed.

CONDITION OF SALE, WARRANTY, LIMITATION OF LIABILITY

This product conforms to the chemical description on the label thereof and is reasonably fit for the purpose stated on such label only when used in accordance with directions under normal use conditions. Follow directions carefully. Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material, not in strict accordance with directions given herewith. In no case shall the seller be liable for consequential, special or indirect damages such as loss of profits or values resulting from the use of handling this product.
