INFORMATION ON WEED RESISTANCE

Glyphosate, the active ingredient in this product, is a Group 9 herbicide. Target site resistance to Group 9 herbicides is rare. Although rare in occurrence, any weed population may contain plants naturally resistant to Group 9 herbicides. Weed species resistant to Group 9 herbicides may be effectively managed utilizing another herbicide from a different Group or using other cultural practices.

Weed resistance management recommendations for Group 9 herbicides are:

- Ensure optimum weed control by making applications at the right time (correct weed size) and utilizing the recommended label rate for the most difficult to control weed in your field.
- Base decisions on local needs and use the tool(s) necessary to obtain optimum weed control and minimize weed escapes.
- Avoid tank-mixtures that reduce this product's efficacy (through antagonism) or which encourage rates of this product below the label recommendations.
- Scout treated weed populations for escapes 2-4 weeks after application.
- Report any incidence of repeated non-performance of this product on a particular weed to the local retailer, county extension agent, or Albaugh representative.

Read the "LIMIT OF WARRANTY AND LIABILITY" in the label booklet for GLY STAR ORIGINAL herbicide before using. These terms apply to this supplemental labeling and if these terms are not acceptable, return the product unopened at once.

Glyphosate 41% Original
EPA Reg. No. 42750-60

Dear Mr. Tompkins,

Enclosed are product bulletins for the above referenced registrations for weed resistance management Directions for Use. The text for these supplemental labels is identical to that approved for Monsanto's Roundup WeatherMAX (EPA Reg. No. 524-537) on October 30, 2003. Per our understanding these labels are being submitted as notifications.

Please call if you have any questions.
