UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, D.C. 20460

> OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

JAN 1 3 2014

Ms. Carolyn Miller Albaugh, Inc. P.O. Box 2127 Valdosta, GA 31604

Subject: Revised Label to Add Prohibition Statement Specific to the State of Oregon

Dear Ms. Miller:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated December 3, 2013 for:

EPA Registration 42750-154

Imidacloprid 0.2G

The Registration Division (RD) has conducted a review of this request of applicability under PRN 98-10 and finds that the label changes(s) requested falls within the scope of PRN 98-10. The label has been date-stamped "Notification" and will be placed in our records.

If you have any questions, call me at 703 305-5409 or electronically at daniel.dani@epa.gov.

Sincerely, Son'l

Dani Daniel Registration Division (7504P) Insecticide/Rodenticide Branch

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through skin. Causes eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS

This product is highly toxic to aquatic invertebrates. Do not apply directly to water. Do not contaminate water when cleaning equipment or disposing of equipment washwater.

WHAT IMIDACLOPRID 0.2 G LAWN AND GARDEN INSECTICIDE DOES

White grubs can cause extensive damage to turf by feeding on grass roots. Affected turf turns yellow, then brown, and is easily pulled up in pieces with your hands. Mole crickets can seriously damage lawns by their tunneling activity. Some species also feed on the grass roots, as well. IMIDACLOPRID 0.2 G prevents turf damage by kilting grubs and mole crickets when they are newly hatched and before they can cause turf damage.

IMIDACLOPRID 0.2 G works best when applied before grubs and mole crickets hatch. The active ingredient will remain in the root zone of the turf until the eggs of grubs or mole crickets hatch. These newly hatched insects are highly susceptible to IMIDACLOPRID, and are killed before they become large enough to cause turf damage. IMIDACLOPRID 0.2 G also kills grubs in landscaped ornamental areas containing flowers, ground covers, shrubs and trees.

If you have questions regarding the best time to make applications in your area, you can consult your local County University Extension Office. Be sure that you describe the product you are using when seeking such advice.

HOW TO APPLY IMIDACLOPRID 0.2 G LAWN AND GARDEN INSECTICIDE

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For residential use on lawns and landscaped areas.

Do not apply this product by any application method, to linden, basswood or other *Tilia* species in the State of Oregon.

READ ALL DIRECTIONS FOR USE AND CONDITIONS OF SALE BEFORE USING

APPLICATION TO LAWNS:

Pests Controlled:

White grubs (including the larvae of Japanese beetle, Oriental beetle, Chafers, Asiatic garden beetle, May or June beetles, and black turfgrass ataenius), European Cranefly (larvae) and mole crickets.

How to Apply:

Using either a drop-type or rotary-type spreader, apply IMIDACLOPRID 0.2 G uniformly over the area, being treated. Avoid the use of spreaders which may apply the product in narrow, concentrated or concentrated or concentrated or concentrated area, uneven bands. Calibrate your spreader according to the spreader manufacturer's directions to ensure the proper amount of IMIDACLOPRID 0.2 G is applied. Check frequently to be sure spreader is working property and spreading granules evenly.

2

ccccc

After Applying:

IMIDACLOPRID 0.2 G will work best if the lawn Is watered thoroughly or if rainfall occurs within 24 hours after application to move the active ingredient through the thatch and down into the soil. Avoid mowing fawn until watering or rainfall has occurred so that the uniformity of the granules is not disturbed.

When to Apply:

IMIDACLOPRID 0.2 G works best when applied before grubs and mole crickets hatch. For best results, apply as follows:

White grubs: Apply once, anytime from April through mid-August.

Mole crickets: In Florida, apply once from early April through early May. Elsewhere, apply once from mid-May through mid-June.

Do not Apply IMIDACLOPRID 0.2 G when turf areas are waterlogged. The product may not work effectively under these conditions.

How Much to Apply:

For control of white grubs, IMIDACLOPRID 0.2 G should be applied at the rate of 2.87 pounds per 1,000 square feet. For mole cricket control, apply 3.8 pounds per 1000 square feet. The table below can be used as a guide for applying the proper rate of IMIDACLOPRID 0.2 G. However, the application rate can vary depending on the speed of application and the condition of the spreader. For best results, use a normal, steady pace when applying to obtain an accurate, even application.

	Setting*				
Spreader Model	To Deliver 2.87 lbs per 1,000 sq ft	To Deliver 3.8 lbs per 1,000 sq ft

Scotts Speedy Green True Temper Rotary					

SPREADER SETTING TABLE

Settings are approximate. The condition of your spreader, the speed at which you walk and uneven

4/8

terrain may affect the rate of application. Calibrate your spreader according to manufacturer's directions.

Tip: 1,000 sq ft = 20 ft x 50 ft

Do not use a spreader that applies granules in narrow, concentrated, or uneven bands. Be sure the spreader works properly and spreads granules evenly.

APPLICATION TO LANDSCAPE PLANTINGS (Trees, Shrubs, Evergreens, Flowers, Ground covers)

Pests Controlled:

White grubs (including larvae of Japanese beetle, Oriental beetle, chafers, Asiatic garden beetle, European Cranefly, May and June beetle, and black turfgrass ataenius).

How to Apply:

Apply as a broadcast treatment to soil, mulch or other substrate. Prior to application, remove black plastic from area to be treated to allow water to penetrate into the soil. Permeable weed barriers need not be removed prior to application.

After Applying:

IMIDACLOPRID 0.2 G will work best if material is worked into the soil around plants or if a thorough watering of rainfall occurs within 24 hours after application to move the product down through mulch and into the soil.

When to Apply:

The best control of grubs will be obtained if IMIDACLOPRID 0.2 G is applied before grubs begin to hatch. For best results, application should occur from April through mid-August.

DO NOT apply to waterlogged areas. IMIDACLOPRID may not work effectively under these conditions.

How Much to Apply:

IMIDACLOPRID 0.2 G should be applied at the rate of 2.87 pounds per 1,000 square feet. This 15 pound bag will treat 5,000 square feet of landscaped area. The table above can be used as a guide for applying the proper rate of IMIDACLOPRID 0.2 G. However, the application rate can vary depending on the speed of application and the condition of the spreader.

NOTE: DO NOT apply IMIDACLOPRID 0.2 G to vegetable gardens.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal

Storage Conditions: Store in original container in a cool, dry place, out of the reach of children, preferably a locked storage cabinet.

Disposal

If empty: Do not reuse container. Place in trash or offer for recycling if available, the transformation of the second solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Paper and plastic bags: Completely empty bag into application equipment. Then dispose of in a sanitary container by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of liability before using this product.

If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following conditions, disclaimer of warranties and limitations of liability.
