----------	---

HOW MUCH TO APPLY	<p>Trees: 1 oz per inch of distance around trunk  Shrubs: 3 oz per foot of height.</p>
-------------------	--

TREE WITH ONE TRUNK:

Measure distance (in inches) around tree trunk at chest height. A flexible tape measure is the recommended method [tool]. This is the number of ounces of IMIDACLOPRID 1.47% FL to apply.

DIRECTIONS FOR USE

	<p><b>TREES WITH 2 OR MORE TRUNKS:</b></p> <p>Measure the distance (in inches) around each tree trunk and add together. Multiply this total by 0.75 to get the required number of ounces of IMIDACLOPRID 1.47% FL to apply.</p> <p>Example: A tree has 4 trunks. They measure 20, 10, 5 and 5 [inches] or a total of 40 [inches], 40 X 0.75 = 30 ounces.</p>
	<p><b>SHRUBS:</b></p> <p>Measure the height of the shrub to the nearest foot. Round any inches down to the nearest foot if less than 6" and up to the nearest foot if greater than 6". Multiply the number of feet by 3 - this is the number of ounces of IMIDACLOPRID 1.47% FL to apply.</p>
	<p>Do not make more than one application per year.</p>
<p><b>HOW TO APPLY</b></p>	<ul style="list-style-type: none"> <li>• Fill a bucket or watering can with 1 gallon of water. [For trees with circumference greater than 50', use 2 gallons of water.]</li> <li>• Shake the bottle of IMIDACLOPRID 1.47% FL well.</li> <li>• Remove the measuring cup. [Each marking inside is one ounce.]</li> <li>• Carefully measure required amount of product into bucket.</li> <li>• Slowly pour the solution evenly around the tree. For best results, pour as close to the TRUNK/main stem of the tree/shrub as possible.</li> <li>• Fill the bucket with clean water and pour it around the trunk as well.</li> </ul>
<p><b>FOR BEST RESULTS</b></p>	<p>Use this product as part of an overall tree and shrub health care program before problems start [preferably in the fall]. However, IMIDACLOPRID 1.47% FL can be applied anytime except when the ground is waterlogged or frozen. These conditions inhibit the movement of the product down into the root zone.</p> <p>During prolonged dry periods [spells], water the tree/shrub well the night before making an application.</p> <p>For severe infestations, treat with a foliar insecticide labeled for use on ornamentals then use IMIDACLOPRID 1.47% FL as part of a routine care program.</p>
<p><b>HOW IMIDACLOPRID 1.47% FL WORKS</b></p>	<p>The insecticide dissolved in water moves down through the soil, where it is absorbed by the roots. Once absorbed, it moves up through the tree or shrub providing year-long insect protection. IMIDACLOPRID 1.47% FL even moves into new growth after application, thus protecting it, too. To get complete protection, the insecticide must distribute completely through the tree/shrub. Depending on the size and health of the plant, this may take one week to three months (for very large trees). Rain or water cannot wash off this internal protection.</p>

(NOTE: Application to trees heavily infested may not prevent their eventual loss due to existing pest damage and tree stress)

IMPORTANT- DIRECTIONS FOR STORAGE AND DISPOSAL

Store in original container in a cool, dry place, out of the reach of children, preferably a locked storage cabinet.

IF EMPTY:

- Do not reuse container.
- Place empty container in trash or offer for recycling if available.

IF PARTLY FILLED:

- Call your local solid waste agency for disposal instructions.
- Never place unused product down any indoor or outdoor drain.

NOTICE: Research and testing have determined that the "Directions for Use" are appropriate for the proper use of IMIDACLOPRID 1.47% FL under expected conditions. The Buyer assumes responsibility for lack of performance or safety if not used according to the directions.
