# PRECAUTIONARY STATEMENTS

## HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION:** Harmful if inhaled. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

## ENVIRONMENTAL HAZARDS

**For terrestrial uses only:** This pesticide is toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, or gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. [Always read and follow label directions.]

**METHODS OF USE AND GENERAL APPLICATION INSTRUCTIONS**

**[General Instructions/How It Works]:**

Ammonium Nonanoate is the primary ingredient and is formulated to kill any plants/weeds that are green and growing. This simple formula works to kill only what you see where you sprayed. Weeds will turn brown within hours. Perennial or more established weeds may take multiple applications. For best results, re-apply product every 2 to 3 weeks.

*And/or*

[This product is a contact, non-selective herbicide for spray application only to undesirable plant growth. Do not allow spray to contact any green plant parts of desirable plants. This product provides control and burndown suppression of annual and perennial broadleaf and grass weeds. Mosses and liverworts are also controlled. The amount of burndown and the duration of weed suppression may be reduced when weeds are under environmental stress or large in size].

*And/or*

[This product is a non-volatile and water-soluble herbicide for foliar application to weeds. Complete and uniform coverage of weeds by the spray solution is required for the best weed control. Plant foliage will change from a green color to brown/black within one to two hours after spray application. This product's effect on plant tissue may be more rapid in warm weather than in cold conditions. However, weed control is normally unaffected by temperature.]

*And/or*

[This product is an herbicidal soap product which penetrates the cell walls of plants to disrupt the intracellular organization and compartmentalization of physiological functions by membranes within the cell walls. Plant growth ceases when cellular contents are mixed and brown necrotic plant tissue is formed.]

This product does not migrate through the soil and is not translocated in plants. **To ensure satisfactory control, plant leaves must be thoroughly and uniformly covered with the spray solution. This product** does not provide any residual weed control in soil to affect germinating weed seed. [This is a vegetative burndown spray for control of broadleaf weeds and grasses.] [For best results, apply this product when weeds are small.]

**Use [Application] Instructions/How to Apply/Use:**

**This product** is completely soluble in water. No shaking or agitation is required.

[During application, some foaming may occur; however, weed control is not reduced if the foam is deposited on the plant surface and is not blown away as drift].

**WHERE TO USE/APPLY**

- For outdoor use only.
- Use on walkways, driveways, under trees and in landscape beds.

**HOW TO USE/APPLY**

- [Adjust nozzle to the desired spray setting].
- Apply/spray until weeds are completely covered/run-off from weed leaves occurs.
- Apply to dry weed surfaces only.
- Use a cardboard or plastic shield to block spray from contact desirable plants nearby. If desirable plants are accidentally sprayed, rinse off immediately with water.
- Difficult to control weeds may require several applications for complete control.

**WHEN TO USE/APPLY**

- Apply any time of year when weeds are small [3 inches tall or wide] and actively growing.

- Apply when winds are calm.

**IMPORTANT:** Do not spray plants or grasses you like - they will die. Not recommended for spot weed control in lawns since this product kills lawn grasses. Do not allow treated weeds to come in contact with desirable plants until spray has dried.

**Note To PM: The following text up to the weeds controlled list is an Alternate/Optional How to Use/Apply to the above text**

**[How to Apply]**

**Hand-Held Spray Application**

Spray weeds until all leaf surfaces are covered. The number of weeds present, leaf shape, weed size and weed species will affect spray coverage.

Thorough saturation of the foliage and stems is required for control. Apply sprays until run-off from weed leaves occurs. Use low spray pressure to reduce foaming and avoid contact with desirable plants.

*And/Or*

**Directed Spray Application**

Use a shielded sprayer to prevent spray contact on desirable plants. Avoid spray contact with green plant stems or green bark of young trees and shrubs. Some visible foam may appear on the leaves as the plants are sprayed. Overspray or drift onto desirable plants is usually not a serious problem because leaves and stems require a thoroughly wet spray coverage for significant injury. Repeat applications as often as necessary to obtain desired control.

**Use Methods/How to Use**

Determine the weed control situation and select the use method required as follows:

**A. Vegetative Burndown:** Broadcast spray before no-till planting or seedbed preparation to control weeds prior to seeding or transplanting. Spot sprays may be used in and around gardens and landscape plants/ornamentals.

**B. Directed and shielded sprays:** Use spray nozzle type, or configuration for directed spray, or a shield placed around the nozzle to prevent spray contact on the foliage or green stems or bark. Use directed/shielded spray applications to area between plastic mulch strips and staked crops for weed control.

**I. Weeds controlled or suppressed by this product:**
