U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
 Registration Division (7505C)
 1200 Pennsylvania Ave., N.W.
 Washington, D.C. 20460

EPA Reg. Number:

42882-2

Date of Issuance:

DEC 7 2006

NOTICE OF PESTICIDE:

Registration
 Reregistration

(under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

EPIBLOC® Rodenticide

Name and Address of Registrant (include ZIP Code):

Gametrics Limited
 HC 65 Box 16
 Alpine, TX 79830

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product when the Agency requires all registrants of similar products to submit such data.
2. Make the following label changes before you release the product for shipment:
 - a. Revise the EPA Registration Number to read, "EPA Reg. No. 42882-2." ✓
 - b. Under the product name, on the front panel, add the following: "For Control of Norway Rats Only." Also revise "rats" to "Norway rats" wherever it appears on the label.

Signature of Approving Official:

John Hébert, Product Manager (07)
 Insecticide-Rodenticide Branch, Registration Division (7505C)

Date:

Dec. 7, 2006.

- c. Under Use Restrictions make the following changes.
 - 1. The first sentence should read, "...industrial and commercial facilities and sanitary sewers only."
 - 2. Revise the third sentence to read, "Sachets must always be placed in tamper resistant stations except for sanitary sewer placements."
 - 3. Add the following: "Do not use in any facility (i.e., schools, libraries, etc.) where children may be present."
- d. Under Indoors of Industrial and Commercial Facilities delete the ellipsis at the end of the heading.
- e. Replace "Application Directions" with "Prebaiting and Baiting" and revise the section as follows: "Good bait ...effective. Rats may shy away from unfamiliar food or food that has made them sick without killing them. Prebaiting rats with bait similar to EPIBLOC but lacking the active ingredient is needed to promote acceptance of EPIBLOC when it is applied. Prebaiting is required with the use of EPIBLOC."
- f. Under In Sewer Use make the following changes:
 - 1. Add "Sanitary" to the sewer use heading so that it reads: "In Sanitary Sewer Use."
 - 2. Revise the directions as follows, "...or any other accessible places with signs of recent rat activity. Once suitable applications points have been determined, place 2 to 4 sachets of prebait at each point. If the prebait can be washed away, wire sachets in place. Maintain prebait at application points for at least 2 days. After acceptance of prebait has been established, replace prebait sachets with sachets of EPIBLOC. Use 6 to 10 sachets per application point. Do not apply EPIBLOC in sewers if heavy rains and or flooding are forecasted. Sachet is moisture resistant...."
- g. Revise the Precautionary Statements as follows: "Keep out of reach of children, pets, domestic animals, and wildlife. Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse."
- h. Under the "If in Eyes" statement move "Do not give anything to an unconscious person" to the end of the "If Swallowed" statement.
- i. Revise the disposal statements under Storage and Disposal as follows:

"Pesticide Disposal: Wastes resulting for the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Offer empty container for recycling, or dispose of in a sanitary landfill or by incineration, or if allowed by state and local authorities by burning. If burned, stay out of smoke.”

- j. Revise the last sentence of the Warranty Statement to read: “To the extent consistent with applicable law, seller makes no other warranty....”

3. There was only one label submitted for review for this product. As a result, the entire labeling must appear on each sachet.

4. Submit one copy of the revised final printed label for the record before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(c). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Enclosure

Precautionary Statements

Hazards to Humans and Domestic

Animals CAUTION: Keep out of reach of children, pets, domestic animals, and wildlife. Harmful if swallowed. Avoid contact with eyes or skin. In case of contact wash with plenty of water.

ENVIRONMENTAL HAZARDS:

Keep out of any body of water.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS: EPIBLOC is a unique Rodenticide for control of the Norway rats (Rattus norvegicus) indoors of industrial and commercial facilities and sanitary sewers. EPIBLOC will kill rats eating a sufficient quantity and it is likely that some males surviving the baiting will be rendered sterile. Sachets must be placed in tamper resistant bait stations or in locations not accessible to children, pets, domestic animals or wildlife. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

APPLICATION DIRECTIONS:

Good bait acceptance is mandatory for any Rodenticide to be effective. Rats shy away from unfamiliar food. By prebaiting, rats become accustomed to new food. Prebaiting is required with the use of EPIBLOC.

Warranty Statement - Seller warrants that the product conforms to its commercial description and when used according to label directions under normal conditions of use it is reasonably fit for the purpose stated on the label. Seller makes no other warranty either expressed or implied, and buyer assumes all risks should the product be used contrary to label directions.

**ACCEPTED
with COMMENTS
In EPA Letter Dated:**

DEC 7 2006

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 40882-2

RESTRICTED USE PESTICIDE

“Due to potential toxicity and reproductive effects to non-target organisms.”

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator’s certification.

**EPIBLOC®
RODENTICIDE**

Active Ingredient:

Alpha-chlorohydrin (3-chloro-1, 2-propanediol) 1%

Inert Ingredients 99%

KEEP OUT OF REACH OF CHILDREN

CAUTION See Side Panel for Additional Precautions

FIRST AID STATEMENTS

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor.

If On Skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a poison control center or doctor for treatment advice. Do not give anything to an unconscious person.

**INDOORS OF INDUSTRIAL AND
COMMERCIAL FACILITIES USE....**

Determine area where rats will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners or concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Prebaiting is required; apply 1 to 2 sachets of prebait per placement. Maintain an uninterrupted supply of prebait for at least 2 days. As feeding becomes established on prebait sites, replace with 6 or more bait sachets. The sachet is moisture resistant to preserve bait freshness. Collect all uneaten and partially uneaten sachets 5 to 10 days after placement. Dispose of in an approved manner, according to Federal, State and Local procedures.

IN SEWER USE: Determine where rats will most likely find and consume bait. Generally these areas are manholes, tramlines, tributaries, sewer line junctions or any other accessible place. Prebait by applying 2 to 4 sachets of prebait to selected sites. After feeding has been established, place bait sachets at prebait and other selected sites to cover the entire area. Place 6 or more sachets per placement. Sachet is moisture resistant to preserve bait freshness. Collect all uneaten and partially uneaten sachets 5 to 10 days after placement. Dispose of in a approved manner according to Federal, State and Local procedures

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original container in a dry place away from foodstuffs, and under lock and key.

Pesticide Disposal: Pesticide that cannot be used according to label instructions must be disposed of according to Federal, State or Local procedures under the Resource Conservation and Recovery Act.

Container Disposal: Dispose of uneaten sachets according to approved Federal, State or local procedures under Resource Conservation and Recovery Act.
