PERFORMANCE SPECIFICATIONS

It is intended for use throughout the life of the product and the
product is intended for use in the presence of dirt and debris.
When used as a disinfectant, it is intended for use on hard
surfaces.
It is effective against most bacteria. When used with a 10%
solution, it is effective against a wide variety of bacteria.
It is effective against most fungi and yeasts. Pseudomonas aeruginosa
is not included in the list of organisms that it is effective against.
It is effective against most viruses. It is not effective against
the following: HIV, hepatitis A virus, hepatitis B virus, hepatitis C virus,
herpes simplex virus, cytomegalovirus, and varicella-zoster virus.
It is effective against most protozoa. It is not effective against
the following: Toxoplasma gondii, Cyclospora cayentensis, and
Cryptosporidium parvum.
It is effective against most algae and fungi. It is not effective
against the following: Microsporidium, and other microsporidia.
It is effective against most molds and yeasts. It is not effective
against the following: Aspergillus, Penicillium, and other molds.
It is effective against most bacteria. It is not effective against
the following: Mycobacterium tuberculosis, Mycobacterium
avium-intracellulare, and other mycobacteria.
It is effective against most viruses. It is not effective against
the following: HIV, hepatitis A virus, hepatitis B virus, hepatitis C virus,
herpes simplex virus, cytomegalovirus, and varicella-zoster virus.

PERFORMANCE SPECIFICATIONS

F/H is intended for use throughout hospitals, commercial institutions (i.e. schools) and animal care areas. It is effective on walls, ceilings, tables, counters, shelves, racks, carts, refrigerators and coolers as well as processing, preparation equipment.

F/H is an effective hospital disinfectant/cleaner. When mixed with water (1-96) it provides 533 ppm of active quaternary Staphylococcus aureus, Salmonella choleraesuis, Pseudomonas aeruginosa, Bacillus subtilis, and Klebsiella pneumoniae according to A.P.A.C. Use Dilution Method. F/H is fungicidal and bactericidal. F/H is also virucidal; kills Influenza A, (A/WSN/33), Herpes Simplex, Vaccinia, Feline Pneumonia and other environmental surfaces.

F/H at 1 oz /gal. water (1-128) provides general disinfection. Hospital strength is not required.

F/H at 1/2 oz. per gallon of water (1-256) provides 200 ppm which has been cleared for use in the terminal rinsing of dairy equipment, dishes and glasses in restaurants and taverns.

F/H is authorized for use under the U.S.D.A. Inspection Service for poultry, meat, rabbit and egg product plants, as a sanitizing cleaner for equipment and utensils. When used as such, a pre-rinse is not required.
