Keep from Freezing

STORAGE AND DISPOSAL

Storage: Store at ambient temperature. Keep container tightly closed when not in use. Do not freeze. Do not mix with soaps and detergents.

Disposal: Do not reuse empty container. Triple rinse empty container with water and discard in trash collection.

Uses: OMEGA is intended primarily as a heavy duty cleaner where disinfection and deodorization are also indicated. It is intended for use on hard surfaces such as polished tile, glass, stainless steel, chrome, and does not damage washable painted, varnished or enameled surfaces. Because OMEGA rinses spot free, it is particularly suitable for use on aluminum, tile, cork, vinyl and asphalt tile floors. It has superior cleaning qualities and is an excellent cleaner for marble or terrazzo. OMEGA is recommended for use on commercial buildings.

PRECAUTIONARY STATEMENTS - HAZARD TO HUMANS AND DOMESTIC ANIMALS.

Danger: Keep Out Of Reach Of Children. Corrosive. Causes severe eye and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes, and skin when handling. Irritant if swallowed. Avoid contact with food. Avoid breathing spray mist.

First Aid: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before use. If swallowed, drink plenty of large quantity of water. If this product is in contact with you are not available, drink large quantities of water. Call a physician immediately.

Note to Physician: If it is suspected that damage may result, state the site of contact, dosage measures, approximate quantity, and respiratory depression and convulsions may be expected.

BEST DOCUMENT AVAILABLE

Staphylococcus aureus	1 256	Serratia marcescens	1 256
Salmonella choleraesuis	1 256	Shigella flexneri	1 256
Pseudomonas aeruginosa	1 256	Klebsiella sp	1 256
Proteus vulgaris	1 256	Aspergillus niger (mildew)	1 256
Escherichia coli	1 256	Candida albicans	1 256

Fungicidal (1 256) vs. Trichophyton interdigitale (Athletes Foot Fungi) when tested according to A O A C (12th ed.) fungicidal test.

Mildewicidal (1 256) - kills Aspergillus niger which causes "Black Mildew" on contact on environmental surfaces.

Vitucidal (1 256) - on environmental surfaces kills Influenza A₁ (Aichi), Para influenza (Sendai), Canine distemper, Feline pneumonitis, and Vaccinia viruses.

As a fungistat: Apply use dilution (1 256) to pre-cleaned, hard, non porous surface. Wet surface thoroughly. If not washed or rubbed off, it will control the growth of mold and mildew on environmental surfaces for a period of 7 days. To maintain fungistatic control, repeat application in 7 days or when new growth appears.

Directions for use: General Classification: It is a violation of Federal law to use this product in a manner inconsistent with the label instructions.

To prepare an accurate solution use Airwick's metering pump to dispense 1/2 oz. of the concentrated product. Use one pump stroke (up and down) for each gallon of solution prepared. To increase detergency in heavily soiled areas, use two (1 128) or three strokes (1 85) per gallon. Apply use dilution with a cloth, sponge, mop, brush or sprayer. Wet all surfaces thoroughly. No rinse necessary unless used on food contact surfaces. Treated food contact surfaces must be rinsed with potable water prior to reuse.

HOW OMEGA WORKS

OMEGA is a balanced formulation containing Airwick's free deodorants, synthetic detergents, organic chelating agents, and synergizing builders for effective cleaning, disinfecting and deodorizing in one step cleaning operation. OMEGA at a dilution of 1 256 is effective against the following:

Bacteria

Staphylococcus aureus
Salmonella choleraesuis
Pseudomonas aeruginosa
Proteus vulgaris
Escherichia coli
Serratia marcescens
Shigella flexneri
Klebsiella sp

Fungi

Trichophyton interdigitale
Aspergillus niger
Candida albicans
Viruses
Influenza A₁ (Aichi)
Paramfluenza (Sendai)
Canine distemper
Feline pneumonitis
Vaccinia

As a detergent: OMEGA's BIODEGRADABLE detergents in combination with synergizing builders (a) loosen soil through superior wetting and penetrating action, (b) suspend insoluble matter in solution, and (c) emulsify oil and grease. Low foaming OMEGA leaves surfaces soil free and film free.

As a disinfectant: When used as directed (1/2 oz. to 1 gallon) OMEGA provides approximately 469 ppm of one of the most potent germicides commercially available, enhanced by chelating agents which inactivate metallic ions to increase effectiveness. On environmental surfaces, OMEGA rapidly destroys a broad range of gram positive and gram negative organisms such as those listed below.

Germicidal vs. the following organisms when tested according to A O A C (12th ed.) Use Dilution procedure at 20°C.

BEST DOCUMENT AVAILABLE

ACTIVE INGREDIENTS

n Alkyl (60 C ₁₄ -30 C ₁₈ , 5 C ₁₂ , 5 C ₁₅) dimethyl benzyl ammonium chlorides	5.8
n Alkyl (68 C ₁₂ -32 C ₁₄) dimethyl ethyl benzyl ammonium chlorides	5.8
Essential oils	1.0
Tetrasodium ethylenediamine tetraacetate	1.0
Sodium Carbonate	0.5

INERT INGREDIENTS 85.9%

A 33 Dry is more than a fine detergent. It disinfects, and kills odors too. **DETERGENT** Biodegradable nonionic detergents, synergized with alkaline builders. This gives the wetting, penetrating, suspending and emulsifying action you need for even the most difficult soils. A 33 Dry's heavy foaming action leaves spot free surfaces.

DISINFECTANT Used as directed (1 1/2 ozs. to 3 qals.) A 33 Dry provides approx. 450 ppm. of one of the most potent germicides commercially available, enhanced by synergizing builders which inactivate metallic ions to increase effectiveness.

VIRUCIDE On environmental surfaces A 33 Dry kills viruses such as Influenza A₂ (Aichi), Paramfluenza I (Sendai), Herpes Simplex, Vaccinia, Coxsackie B₂ Distemper and Equine Pneumonia.

ODOR COUNTERACTANT A 33 Dry actually counteracts odors to leave the area smelling fresh and clean. That's Airkem's famous Air Freshened Effect (AFE).

DIRECTIONS Put one packet in a wash bucket for each three-gallons of water used. Add the proper amount of warm water. Stir gently for a uniform solution. One container (40 packets) makes 120 gallons of solution. Apply solution with mop, sponge, cloth, scrubber or sprayer. Remove solution and the entrapped soil with a clean, wet mop, sponge or wet vacuum pickup.

USES A 33 Dry is intended primarily as a heavy duty cleaner where positive disinfection and odor counteraction are required. It is unexcelled for cleaning hard surfaces such as porcelain, glass, tile, stainless steel, chrome, vinyl, linoleum, asphalt or rubber.

Minimum A O A C Use Dilution Confirmation at 20 F.

<i>Salmonella choleraesuis</i>	1:256	<i>Escherichia coli</i>	1:256
<i>Staphylococcus aureus</i>	1:256	<i>Proteus vulgaris</i>	1:256
<i>Tribophyton interdigitale</i>	1:256	<i>Serratia marcescens</i>	1:256
<i>Pseudomonas aeruginosa</i>	1:256	<i>Shigella flexneri Type II</i>	1:256
<i>Pseudomonas cepacia</i>	1:256	<i>Klebsiella spp</i>	1:256

1 container (40 packets) makes 120 qals. of solution

DANGER: Corrosive. Causes eye damage and severe skin irritation. Do not get loose powder in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food. Do not open packets, place directly into bucket. Avoid breathing sprayed mist. **DO NOT REMOVE PACKETS BEFORE USE.**

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before re-use.

If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician immediately.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.
