CASE'S CLEAR POOL SHOCK TREATMENT

**"FOR SWIMMING POOL CHLORINATION
AND SANITIZING."**

ACTIVE INGREDIENT
SODIUM HYPOCHLORITE 12.5%
INERT INGREDIENTS 87.5%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

FIRST AID: If on skin, wash with plenty of soap and water. If in eyes, flush with water for at least 15 minutes. Get medical attention. If swallowed, drink large quantities of milk, or gelatin solution or, if these are not available, drink large quantities of water. Do NOT give vinegar or other acids. Do NOT induce vomiting. Get prompt medical attention.

See additional precautions on side panel

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT
IN A MANNER INCONSISTENT WITH ITS LABELING**

DIRECTIONS FOR SWIMMING POOL CHLORINATION
For a new pool, start for spring start-up, super-chlorinate with 1.5 lbs. of sodium hypochlorite per 10,000 gallons of water. For existing pools, add 1 to 5 ppm available chlorine by weight.
For Pool Maintenance:
A) Adjust pool water pH to 7.2-7.6.
B) Adjust manually or by automatic chlorinator to maintain 1.0 ppm available chlorine. Do not allow chlorine level to fall below 0.5 ppm available chlorine by weight. Supplement additional chlorine if level falls below 0.5 ppm available chlorine by weight. Test water frequently with DPD chlorine test kit to maintain chlorine level at 1.0 ppm available chlorine.

**DIRECTIONS FOR DISINFECTION OF POTABLE WATER
FOR HOME WELL WATER SYSTEMS**
Dilute this sodium hypochlorite solution to a ratio of 1 part to 100 parts of water. Add 1 part of this solution to 100 parts of water thoroughly and begin feeding of water with a separate chlorinator in series. Maintain a free available chlorine residual of at least 0.5 ppm and a minimum of 0.6 ppm throughout the distribution system as determined by a DPD chlorine test kit. Bacteriological sampling must be conducted at all public water supplies as prescribed by the National Interim Primary Drinking Water Regulations. Test water frequently with a DPD chlorine test kit.
*Contact your local Health Department for further details.

**DIRECTIONS FOR SANITIZING FOOD PROCESSING
OR DAIRY EQUIPMENT**
Clean equipment in the normal manner. Then immerse in a solution of 100 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of one fluid ounce of this sodium hypochlorite solution per five gallons of water will provide approximately 200 ppm available chlorine by weight.
NOTE: This product degrades with age. Use as soon as possible and increase dosage as necessary to obtain desired results. See label for further details.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burning in an approved landfill. Product or residue that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food or feed by contact, disposal or cleaning of equipment.
