

GENERAL INFORMATION

HERCULES AZAK is a highly effective insecticide for the control of a wide range of insects on a variety of crops. It is particularly effective against the Colorado potato beetle, the European spruce sawfly, and the European spruce sawfly. It is also effective against the Colorado potato beetle, the European spruce sawfly, and the European spruce sawfly.

DIRECTIONS FOR USE

For general use, apply 1/2 to 1 lb. of AZAK per acre. For control of the Colorado potato beetle, apply 1 lb. of AZAK per acre. For control of the European spruce sawfly, apply 1 lb. of AZAK per acre.

SPRAY EQUIPMENT

Use any type of spray equipment which will give a fine, uniform spray. Do not use equipment which will give a coarse spray or which will cause the spray to drift.

HOW TO MIX THE SPRAY

For general use, mix 1/2 to 1 lb. of AZAK with 100 to 200 gallons of water per acre. For control of the Colorado potato beetle, mix 1 lb. of AZAK with 100 gallons of water per acre. For control of the European spruce sawfly, mix 1 lb. of AZAK with 100 gallons of water per acre.

PRECAUTIONS

Do not apply AZAK to crops which are to be eaten raw. Do not apply AZAK to crops which are to be used for animal feed. Do not apply AZAK to crops which are to be used for human consumption.

NON-RECOMMENDATIONS

Do not apply AZAK to crops which are to be used for human consumption. Do not apply AZAK to crops which are to be used for animal feed. Do not apply AZAK to crops which are to be used for human consumption.
