

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DISINFECTION: To disinfect hard nonporous surfaces (such as walls, floors, table tops), add 1 ounce L 20 Cleaner-Disinfectant per gallon of water. Apply solution with mop, cloth, sponge or mechanical sprayer so as to wet thoroughly. Allow to remain wet for 10 minutes and then let air dry.

To disinfect toilet bowls, flush toilet, add 1 ounce L-20 Cleaner-Disinfectant directly to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes and flush.

For heavily soiled cases, a pre-cleaning step is required and recommended. Prepare a fresh solution for each use.

MILDEWSTAT: To control mild and mold on pre-cleaned, hard non-porous surfaces (such as floor, walls, table top), add 1 ounce L-20 per gallon of water. Apply solution with a cloth, mop, or sponge, making sure to wet all surfaces completely. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals or when mildew growth reappears.

SANITIZATION: To sanitize previously cleaned and rinsed non-porous food contact surfaces, prepare 200ppm active quaternary L-20 solution by adding 1 ounce L-20 to 3 gallons of water.

To sanitize immobile items (such as tanks, chipping blocks, chopper tools) flood the area with 200ppm L 20 solution or apply with a cloth or sponge, making sure to wet all surfaces completely for at least 60 seconds. Let air dry. Prepare a fresh solution for each use.

To sanitize mobile items (such as drinking glasses, eating utensils), immerse in 200ppm L-20 solution for at least 60 seconds, making sure to immerse completely. Remove and let air dry. Prepare a fresh solution daily or more frequently as soon as apparent.

PROHIBITIONS

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL. OPEN DUMPING IS PROHIBITED.

PESTICIDE DISPOSAL

PESTICIDE SPRAY MIXTURE OR RINSATE THAT CANNOT BE USED OR CHEMICALLY REPROCESSED SHOULD BE DISPOSED OF IN A LANDFILL APPROVED FOR PESTICIDES OR BURIED IN A SAFE PLACE AWAY FROM WATER SUPPLIES.

CONTAINER DISPOSAL - PLASTIC LESS THAN 30 GALLONS CHEMICAL ORGANIC
TRIPLE RINSE - OR EQUIVALENT - AND DISPOSE IN AN INCINERATOR OR LANDFILL APPROVED
FOR PESTICIDE CONTAINERS OR BURY IN A SAFE PLACE. DO NOT REUSE EMPTY CONTAINER.

CONTAINER DISPOSAL METAL OR PLASTIC MORE THAN 30 GALLONS CHEMICAL - ORGANIC
 (a) RESEAL CONTAINER AND DEER FOR REUSE, RECONDITIONING, OR
 (b) THOROUGHLY RINSE (ORCLEAN) AND DEER FOR REUSE, RECONDITIONING, OR
 DISPOSAL IN APPROVED MANNER. DO NOT REUSE IN A SAFE PLACE.

L-20 is a phosphate free concentrated detergent-disinfectant which provides effective cleaning, deodorizing, disinfection, and sanitization. L-20 detergent-disinfectant has been designed specifically for hospitals, nursing homes, schools, food processing plants and other institutions where housekeeping is of prime importance in controlling the hazard of cross contamination.

L-20 when diluted at the rate of 1 ounce per gallon of water is an effective disinfectant against the organism *Pseudomonas aeruginosa* and meets all requirements for hospital use. When used as directed, L-20 is formulated to disinfect inanimate hard surfaces such as walls, floors, sink tops, toilet bowls, tables, chairs, telephones and bed frames. For larger areas such as operating rooms, patient care facilities and restrooms, the product is designed to provide both general cleaning and disinfection.

In addition, L-20 deodorizes those areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls and any other areas which are a source of odors caused by microorganisms.

DISINFECTION: At 1 ounce per gallon of water, L-20 exhibits effective disinfectant activity against the following:

<i>Pseudomonas aeruginosa</i> PRD-10	<i>Brevibacterium ammoniagenes</i>
<i>Escherichia coli</i>	<i>Streptococcus faecalis</i>
<i>Klebsiella pneumoniae</i>	<i>Shigella dysenteriae</i>
<i>Salmonella schottmuelleri</i>	<i>Enterobacter aerogenes</i>
<i>Salmonella choleraesuis</i>	<i>Staphylococcus aureus</i>

At this level the product is also fungicidal against the pathogenic fungus *Trichophyton mentagrophytes*.

Virucidal* Activity: The product, when used at 1 ounce per gallon of water on hard surfaces at 1 ounce per gallon of water exhibits effective "virucidal" activity against *Poliovirus*. *Adeno*, representative of the common "flu" virus group.

Efficacy tests have demonstrated that L-20 can effectively deodorize, fungicide, and virucide* in the presence of organic soil (5% blood meal).

Mold and Mildewstat: L-20 prevents and controls mold and mildew and the odors they cause on hard non-porous inanimate surfaces.

SANITIZATION: When used at 1 ounce per gallon of water, L-20 is formulated to provide contact disinfection at a concentration of 200ppm. At this level, **NO HOT WATER RINSE** is required.

L-20 is phosphate free and is safe when used at 1 ounce per gallon of water on hard surfaces.

PRECAUTIONARY STATEMENTS

Hazard to Human and Domestic Animals

DANGER

Keep L-20 out of Reach of Children. Do not use on food or food contact surfaces. Do not get L-20 on your skin or clothing. Wash thoroughly with soap and water if contact occurs. Avoid breathing dust or mist. Avoid contact with eyes. Wash eyes thoroughly with water if contact occurs. Wash hands thoroughly with soap and water after use.

STATEMENT OF PRACTICAL TREATMENT

For use on hard surfaces: Dilute L-20 in water at the rate of 1 ounce per gallon of water. Apply to surface. Allow to remain on surface for 10 minutes. Rinse with clean water. Repeat as necessary.

NOTE TO PHYSICIAN

For use on hard surfaces: Dilute L-20 in water at the rate of 1 ounce per gallon of water. Apply to surface. Allow to remain on surface for 10 minutes. Rinse with clean water. Repeat as necessary.
