

SANEX ROACH & BUG SPRAY

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use in NON-FOOD AREAS of BAKERIES, FOOD HANDLING ESTABLISHMENTS, RESTAURANTS, HOTELS, MOTELS, INSTITUTIONS, SCHOOLS, THEATERS, OFFICE BUILDINGS, APARTMENT BUILDINGS, HOSPITALS, STORES, WAREHOUSES, TRUCK TRAILERS, and RAILROAD CARS.

RESTRICTIONS: Avoid extensive wetting of plastic, rubber and asphalt surfaces such as pipes and floor coverings.

This product is residual in action. Apply it only to the surfaces specified below. Do not use as a space spray. Application to operating surfaces or to surfaces which may become food zones must be avoided.

Before spraying this product, clean all surfaces to be sprayed. Good ventilation is most important for good insect control.

Use a low pressure hand type sprayer. After filling the tank, pump the pressure to 50 lbs. and reapply pressure when it falls to 32 lbs. Application should be made with an even up and down motion so that a film of liquid covers the desired surface to such an extent that the surface when freshly covered glistens but does not run. This practice will deposit approximately one gallon per 1000 square feet. A rough check should be made to determine the number of square feet covered by each application so that a correction may be made if the spray is being applied too lightly or too heavily. The nozzle should usually be held about 18 inches from the surface, but experience will dictate the exact distance desirable.

The area covered should not extend more than 5 feet up the walls and about 18 inches out on the floor. In some basement areas, it is desirable to spray the wall-ceiling junction and the top surfaces of foundation walls. Surfaces that may later become food product zones should never be sprayed.

In addition to the wall-floor areas indicated above - 5 feet up the wall and 18 inches out on the floor - it is well to use an oil can - or a jet, if such an adjustment is available on the sprayer - to squirt insecticide behind cabinets and other wall obstructions where insects may hide or breed and into cracks and crevices and behind power outlets and switchboxes.

Repeat applications, if necessary, when the plant is not in operation.

Food processing plants which have pipe tunnels through which steam and other utilities enter the building from outside should have this tunnel sprayed thoroughly, top, bottom, walls and pipe. Insulated pipes are a favorite hiding place for cockroaches. Do not spray on uninsulated pipes because of possible volatilization.

DISPOSAL

Do not incinerate. Wrap container and put in trash collection.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

May be harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing spray and provide adequate ventilation of area being treated. Contact with skin, eyes or clothing should be avoided. Wash thoroughly after using. Should illness occur, get prompt medical aid.

Avoid contamination of food, utensils and food preparation areas. Thoroughly wash dishes and food handling utensils if contaminated by this spray.

Do not use in edible product areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Contains petroleum distillate. Do not induce vomiting. Get medical attention.

If In Eyes: Flush eyes with plenty of water. Get medical attention.

If On Skin: Wash with soap and water.

Kills exposed stages of: Cockroaches, Silverfish, Grains, Weevils, Bristlehead, Grain Beetles, Flat Grain Beetles, Indian Meal Moths, Confused Flour Beetles, Codling Moth Larvae.

Industrial Crawling Insect Spray (containing Baygon) is a highly effective new formulation which provides rapid kill of such crawling insects as the aforementioned, including those resistant to certain chlorinated hydrocarbon and phosphorus insecticides.

Ready-To-Use, Residual In Action - For Use in Inedible Product Areas of Bakeries, Food Handling Establishments, Restaurants, Hotels, Motels, Institutions, Schools, Theaters, Office Buildings, Apartment Buildings, Hospitals, Stores, Warehouses, Truck Trailers, and Railroad Cars.

ACTIVE INGREDIENTS:

1,2-(1-methylthio)phenoxy methylcarbamate 18
Petroleum Distillate 842

INERT INGREDIENTS 158
100%

Keep Out Of Reach Of Children

CAUTION

TO PHYSICIAN: Atropine sulfate is antidotal.

BEST DOCUMENT AVAILABLE

- c. Revise your directions for use in food areas of food handling establishments to read as follows:

FOOD AREAS - Application Limited to Crack and Crevice Treatment Only: includes areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage, enclosed processing systems (mills, dairies, edible oils, syrups) and serving areas (when food is exposed and facility is in operation).

Apply in small amounts directly into cracks and crevices using equipment capable of delivering a pin stream of insecticide into cracks between different elements of construction, between equipment and floors, openings leading to voids and hollow spaces in walls, equipment legs and bases where (nests pests).

Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE NOT PERMITTED.

NON-FOOD AREAS - Includes entries and vestibules, offices, lavatories, locker rooms, machine rooms, boiler rooms, garbage rooms, garages, floor drains (to sewers), mop closets and storage areas (after canning or bottling).

Apply to cracks, crevices, corners and baseboard areas; around cabinets, windowsills, drains and pipes; to surfaces behind and beneath sinks, lockers, tables, pallets; and to similar areas where insects hide or through which they may enter.

- d. To assist you in preparing your label for final printing, we are enclosing a paper entitled "Label Format."

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

-3-

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(a). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
