Submission to all State Departments of Agriculture for their review and approval of the product name. <p>If these conditions are not complied with, the registrant will be subject to cancellation in accordance with FIFRA section 2(c)(2). Your release for shipment of the product constitutes acceptance of these conditions.</p> <p>A copy of the label is enclosed for your records.</p> <p style="text-align: right;">Bill Patten Project Manager (11) Insecticide-Pesticide Registration Registration Division (TS-767)</p> <p><input type="checkbox"/> ATTACHMENT IS APPLICABLE</p> <p>SIGNATURE OF APPROVING OFFICIAL <i>[Signature]</i></p> <p>DATE 6/15/89</p> | | |

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This aerosol is designed for use in adjustable automatic activators set to dispense a 100 mg. dose every 15 minutes for 8 hours while the plant or institution is not in operation.

STORAGE: Keep in locked storage area.
CONTAINER DISPOSAL: Replace cap and discard container in trash.

DO NOT PUNCTURE OR INCINERATE

Use one aerosol in an automatic activator for each 6,000 cubic feet of room space to be treated. Install the activator on a wall approximately 7 feet from the floor. Do not install directly over any food handling or dispensing area. Never locate automatic activators in drafty hallways or where air currents are excessive. Select areas where the air currents are least noticeable. The rate of air change, shape of space to be treated, humidity and temperature affect insect activity and insect control. One unit per 6,000 cubic feet should be considered as an average ratio. Adjust the ratio depending upon the conditions under which the automatic activator is used.

When properly located, the effectiveness of the SBP-1382 formula will be noticeable within one hour after the activator is started. After one hour of operation, enough insecticide is suspended in the air to kill a substantial proportion of the house flies, mosquitoes and gnats present.

This 12 ounce aerosol contains enough material to operate 825 hours, or 103 days on an 8 hour basis. It is suggested the aerosol be changed once every 3 months on an 8 hour use basis. Also the activator should be periodically checked to assure it is operating only on the off hours period. As with any method of insect control, improved performance is achieved when good sanitary practices and other supplementary fly control methods are used.

LOT NO.
