FLOWABLE CONCENTRATE FOR CONTROL OF MOSQUITO AND BLACK FLY LARVAE

Black Fly Larvae Use enough diluent and measure release. The portion of water in the stream carrying the treatment becomes longer and the treatment more dilute as it goes downstream from the point of treatment. Apply upstream from infestations so that black fly larvae may have at least 5 minutes exposure. Measure stream flow with a meter or approximate using average metric stream depth and width to determine stream area and a floating object timed over a measured distance to gauge velocity. Multiply area times velocity to determine volume of flowing water per minute.

BLACK FLY LARVAE TREATMENT RATES

River or stream size	Milligrams product per liter per minute (ppm) treated water	Treatment duration in minutes
Large	110-200	10
	210-140	5
	100-700	1
Small	1700-550	5
	5000-1000	1

Apply only when there are larvae and not pupae. Allow 24 hours minimum for control. Repeat when reinfestation occurs.

ACTIVE INGREDIENT *Bacillus thuringiensis* Berliner var *israelensis* Serotype H 14 1,000
Aedes aegypti L. (AA) International Toxic Units (ITU) per milligram formulated product* 14.3%
 INERT INGREDIENTS 85.7%
 100%

*Equivalent to 4.16 billion AA ITU per gallon of product

CAUTION: KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Hazards to Humans: Avoid inhalation or contact with eyes or open wounds.

STORAGE AND DISPOSAL

Storage: Keep in original container. Do not use if container is damaged or contents are dry.

Disposal: Do not dump into water. Pour contents into a container of water and dilute. Do not dump into water. Do not dump into water.

FLOWABLE CONCENTRATE FOR CONTROL OF MOSQUITO AND BLACK FLY LARVAE

ACTIVE INGREDIENT: *Bacillus thuringiensis* Berliner var. *israelensis* strain 171-15-10
Aedes aegypti L. (AA) Invertebrate Tox. Units (ITU) per milligram of dry weight 14,000,000
INERT INGREDIENTS:

*Equivalent to 4 to 6 mm AA IT¹ for AA 2, 3, 4, 5, 6.

CAUTION: KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

Hazards to Humans: Avoid contact with eyes. Irritant to eyes.

STORAGE AND DISPOSAL

[illegible]

B.A., M.A., S. 1000, 1000, 1000, 1000

Disposal D 1. *Inter-asset transfers* ; 2. *Inter-asset transfers*

For the first time, the α and β components of the α - β complex were found to be independent of the α - β complex.

DIRECTIONS FOR USE

For my work under Federal Law to use this
part of the information consistent with the
category

APPLICATION RATES

Mosquito Larvae Shave: Stir washed residue Apply-Oil to ponds, water, or other bodies of water 1000 to 10000 times per acre. After 1 ppm. Use the other rates if heavily infested water when 1 ppm. is not effective, and when larvae die, they will float off. Instar M 5th treatments will require 100 times as much. Put a new 1000 after the time Apply-Oil, etc. has been sent over the area. Dangle the 1000 in the water, and stir the water with a net or equipment Apply-Oil, etc. when the pupae start to rise to the surface.

[illegible]

Conditions

Ponds, ponds, flood
water pastures,
ditches, rich fields
brackish water, light to
moderate populations

Rates:

Cycle 4: saline tidal water
salt marshes, storm water
retention areas, sewage waste
treatment, high pollution or
otherwise, potent heavy
vegetation, over high
populations 4th star
bureau 13 tons/acre

Shake the contents well before using. When mixed with water for spray application, it is particularly effective for the treatment of the BACTIMOS Mixtherm 1000 V. It is suitable for the tank. The spray is effective against mold for up to a week. It is necessary to clean water is used in tank. A filter should be used. Apply in a 100 ml. way. Treat 100 ml. per week. It is a treatment of the tank is required. For a spray application, use 100 ml. per 1000 l. of water. To find as a contact person.
