DIRECTIONS FOR USE
GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Initial Dose: 1 gallon MARC 88 to 50,000 gallons of water.
Maintenance Dose: 1 quart MARC 88 to 50,000 gallons of water.
Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Maintain pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose. Maintenance dose should be added at 3-5 day intervals. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently. If make-up water is added at the rate of more than 10% per week, 1 pool capacity, add 1 quart MARC 88 for each 100 gallons of fresh make-up water added per week. When swimming season is over, add 1 gallon of MARC 88 to 50,000 gallons of water in treating water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

MARC 88

CONCENTRATED SWIMMING POOL ALGAEICIDE

KEEPS POOL WATER CLEAR AND FREE OF VISIBLE ALGAE

CONTROLS ALGAE GROWTH

Active Ingredients:
n-Allyl 88% C₁₂ 30%, 5% C₁₂ 5% C₁₂ 5%
dimethyl benzyl ammonium chloride 5%
n-Allyl 88% C₁₂ 32% (1,1) dimethyl
dithiocarbonyl ammonium chloride 5%

Inert Ingredients: 90%
100%

DANGER

See Left Panel for Additional Precautionary Statements

STORAGE AND DISPOSAL

PROHIBITIONS:
Do not contaminate water, food or feed by storage or disposal.
Open dumping is prohibited.
Do not reuse container.
PESTICIDE DISPOSAL:
Pesticide spray mixture or residue that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.

CONTAINER DISPOSAL:
Triple rinse (or equivalent) and offer for recycling, reconditioning or disposal in approved landfill or bury in a safe place. Metal or plastic containers of more than 30 gallons may also be recycled and offered for reconditioning. Plastic containers of less than 30 gallons may also be disposed of in an approved incinerator.
GENERAL:
Consult federal, state or local department authorities for approved alternative procedures.

FEATURES

MARC 88 is used as directed to kill and prevent development of Chloroella pyrenoid, Plectonidium mundum (black green), Plectonidium D. alga, Scenedesmus (blue-green) and other algae.
Compatible with most commonly used chemicals but should not be used with other algaecides or other water-treating chemicals. Kills fast when added to pool water. MARC 88 is not effective on inorganic surfaces.

PRECAUTIONARY STATEMENTS
HAZARD TO HUMAN AND DOMESTIC ANIMALS

Do not get in eyes, on skin or on clothing. Avoid eye and skin damage. Wear goggles or splash goggles when handling. Wash hands and wash contaminated clothing immediately after use.

STATEMENT OF FACTUAL TREATMENT

Skin and Eyes: In case of contact, flush eyes, or skin with plenty of water at least 15 minutes for eyes, and 10 minutes for skin.

Do not swallow. Do not get on clothing, or if these are not possible, wash immediately with plenty of water. Wash hands and face after use.

PHYSICIAN: Possible reaction to use of pool water. Consult physician immediately. Wash hands and face after use.

PRECAUTIONS: This product is for use in swimming pools only. Do not use in hot tubs, spas, or other water features. Apply only to swimming pools. Apply only to swimming pools. Apply only to swimming pools.

DIRECTIONS FOR USE

Initial Dose: 1/2 gallon (64 ounces) Bio-Clean III to 50,000 gallons of water.

Maintenance Dose: 1 pint (16 ounces) Bio-Clean III to 50,000 gallons of water.

Initial dose is used when filling pool at beginning of swimming season. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or re-appear, repeat the treatment procedure as necessary. When pool is free of visible algae, use the recommended maintenance dose.

Maintenance dose should be added at 7-10 day intervals. If high temperatures prevail, or pool has unusually heavy use, add maintenance dose more frequently.

If make-up water is added at the rate of more than 10% per week of pool capacity, add 1 pint of Bio-Clean III for each 10,000 gallons of fresh make-up water added per week.

When swimming season is over, add 1/2 gallon of Bio-Clean III to 50,000 gallons of water left in pool. This dose helps provide a measure of control of algae growth during the winter months. This treatment will also help the servicing of the pool before it is returned to use the following season.

POOL AND/OR WILDLIFE PRECAUTIONS
This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Apply this product only as specified on this label.

DANGER
Keep Out of Reach of Children. See right side panel for first aid and additional precautionary statements.

Sold by:
STANBIO LABORATORY, INC.
2300 E. HOUSTON
SAN ANTONIO, TEXAS 78222

When Bio-Clean III is used as directed, it will kill and prevent development of red, white, yellow, green, blue, black, and purple algae (green, blue-green, black, blue, purple, yellow, and brown algae, cyanobacteria, diatoms, and other swimming pool algae).

Bio-Clean III is compatible with most commonly used swimming pool chemicals. It should not be mixed with soap or chlorine, or combined with other treating chemicals.

Bio-Clean III works best when added directly to pool water. Bio-Clean III will not adhere to pool surfaces.

WARNING
Keep Out of Reach of Children. Can Cause severe eye and skin damage. Get in eyes, on skin or clothing, flush with water. If swallowed, drink milk, egg yolk, or oil. If these are not available, drink large quantities of water. Call a physician.

FIRST AID
In case of contact, immediately flush or skin with plenty of water for at least 15 minutes. For eyes call a physician. Rinse and wash all contaminated clothing. If swallowed, drink milk, egg yolk, or oil. If these are not available, drink large quantities of water. Call a physician.

NOTE TO PHYSICIAN
Probable mucous damage may occur. Cause the use of gastric lavage. May aggravate structural shock, respiratory distress and convulsions may be seen.

STORAGE AND DISPOSAL
Store tightly sealed, away from children. Do not mix with water and discard.

WEST C-104 MICROBIOCIDES

ACTIVE INGREDIENTS:	
Disodium cyanodithioimidocarbonate	7.35%
Potassium N-methyldithiocarbamate	10.15%
INERT INGREDIENTS	82.50%
TOTAL	100.0%

This product contains 1.67 lbs. of active ingredients per gallon and weighs 9.25 lbs. per gallon.

KEEP OUT OF REACH OF CHILDREN

WARNING

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes eye damage and skin irritation. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Avoid contamination of food.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, give patient doses of powdered charcoal immediately or all he can swallow of raw egg white, milk, gruel, or flour and water. Then induce vomiting with salt, soap, or mustard in warm water. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact your Regional Office of the EPA.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal law to use this product inconsistent with its labeling.

WEST C-104 is used to control algae, bacteria, and fungi in commercial and industrial water cooling towers. Prior to use, towers must be cleaned to remove algal growth, microbiological sludge deposits. An initial slug addition of 3.3 to 6.6 fluid ounces per 1000 gallons of water is recommended. Repeat initial control is evident.

Subsequent slug additions of 1.1 to 6.6 fluid ounces of WEST C-104 per 1000 gallons of water should be employed every 1 to 5 days. The frequency of addition depends upon the relative amount of the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide, spray mixture, or rinsate should not be used or chemically reprocessed. Should be disposed of in accordance with approved procedures for pesticides or buried in a safe place away from water.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and recycle, reconditioning, or disposal in an approved landfill, or other approved place. Metal containers over 30 gallons should be resealed before reuse.

GENERAL: Consult Federal, State, or Local disposal authority for approved alternative procedures.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

WEST C-104 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime, and other deposits. An initial slug addition of 3.3 to 6.6 fluid ounces of WEST C-104 per 1000 gallons of water is recommended. Repeat initial dosage until control is evident.

Subsequent slug additions of 1.1 to 6.6 fluid ounces of WEST C-104 per 1000 gallons of water should be employed every 1 to 5 days, or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide, spray mixture, or rinsate that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in an approved landfill, or bury in a safe place. Metal containers over 30 gallons should be resealed before offering for reconditioning.

GENERAL: Consult Federal, State, or Local disposal authorities for approved alternative procedures.
