RESCUE

ALGAECIDE CONCENTRATE

PRODUCT NO.
1401

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Rescue Algaecide Concentrate is used to control the growth of algae in swimming pools, hot tubs, decorative fountains and ponds that do not contain fish. For maximum effectiveness, pools, spas, hot tubs, decorative fountains and ponds containing algae should be cleaned prior to using Rescue. Distribute uniformly directly to water. For Pools, use the following dosage chart.

DOSAGE CHART	POOL CAPACITY IN GALLONS	INITIAL TREATMENT	WEEKLY TREATMENT	FOR VISIBLE ALGAE GROWTH
	5,000	3 oz.	1 oz.	6 oz.
10,000	6 oz.	2 oz.	11 oz.	
20,000	12 oz.	4 oz.	22 oz.	
30,000	18 oz.	6 oz.	33 oz.	
40,000	24 oz.	8 oz.	44 oz.	
50,000	30 oz.	10 oz.	55 oz.	

For Spas, Hot Tubs, fountains and ponds with visible algae growth add 1 oz. of Rescue per 1,000 gallons of water. Subsequent additions of .4 oz. per 1,000 gallons should be made every weekly for maintenance.

Rescue Algaecide is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. Rescue can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Rescue with concentrated dry or liquid chlorine products.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Keep container close when not in use. Leaking or damaged containers should be placed in a plastic bag and discarded in trash. Mop up spills with clear water. All pesticides should be kept out of reach of children and stored away from food.

DISPOSAL: Do not reuse empty container. Wrap container and place in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.

FIRST AID: If swallowed, drink promptly a large quantity of milk, egg whites, or water solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, or ponds. Permits may be required for discharges containing this pesticide into lakes, streams or ponds, or public water. For guidance, contact the regional office of the Environmental Protection Agency.

Green Bay, WI 54303

Subject: Prochlor 64
EPA Registration Number 43497-1
Your Amendment Dated January 31, 1994

This is in response to your amendment to revise label to include the direction for laundry sanitizers.

The labeling referred to above submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended is acceptable provided that you make the following revision before you release the product for shipment bearing the amended labeling.

1. In the Storage and Disposal instructions, delete "or burying in an approved landfill".

A stamped copy is enclosed for your records. Submit five copies of the final printed label.

If you have any questions concerning this letter, please contact Wallace Powell at (703) 305-6838.

Sincerely,

Ruth G. Douglas
Product Manager (32)
Antimicrobial Program Branch

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Corrosive, may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling this product. Wash after handling. Avoid poorly ventilated area as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water. Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved land fill. Product or residue that cannot be used should be diluted with water and disposed of in a sanitary sewer. Do not contaminate food, or feed by storage, disposal or cleaning of equipment.

DIRECTIONS FOR USE
It is a Violation of Federal Law to Use this Product in a Manner Inconsistent with Its Labeling

DILUTION TABLE

200 P.P.M.	1 oz. for every 2 gallons of water.
150 P.P.M.	1 oz. for every 3 gallons of water.
100 P.P.M.	1 oz. for every 4 gallons of water.

FOR SANITIZING AND DEODORIZING

1. Scrape and prewash utensils.
2. Wash with soapy solution.
3. Rinse with clear water.
4. Sanitize with a solution of 1 ounce ProCHLOR 64 to 2 gallons of water (200 ppm). Immerse all utensils for at least two minutes or for a contact time specified by governing sanitary code. Do not rinse with water.
5. Place sanitized utensils on a rack or drainboard to air dry. Test sanitizing solution frequently with a suitable chlorine test kit, and maintain at least 50 ppm available chlorine.

LAUNDRY SANITIZERS

Household Laundry Sanitizers
IN SOAKING SUDES - Thoroughly mix 1 oz. of the product to 2 gallons of wash water to provide 200 ppm available chlorine. Wet 3 minutes, then add soap or detergent, immerse laundry for at least 11 minutes prior to starting the wash/rinse cycle.
IN WASHING SUDES - Thoroughly mix 1 oz. of the product to 2 gallons of wash water containing clothes to provide 200 ppm available chlorine. Wet 3 minutes, then add soap or detergent and start the wash/rinse cycle.
Commercial Laundry Sanitizers
Wet fabrics or clothes should be spun dry prior to sanitization. Thoroughly mix 1 oz. of the product with 2 gallons of water to yield 200 ppm available chlorine. Promptly after mixing the sanitizer, add the solution into the prewash prior to washing fabrics/clothes in the regular wash cycle with a good detergent. Test the level of available chlorine. If solution has been allowed to stand, Add more of the product if the available chlorine level has dropped below 200 ppm.
