**READ ENTIRE LABEL BEFORE EACH USE
USE ONLY ON DOGS AND CATS, HORSES AND PONIES**

Temporarily repels gnats, mosquitoes and biting flies. Contains a grooming agent to ease combing and brushing to remove dead fleas, ticks and lice.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use only in a well ventilated area. Shake well before using. Remove birds and cover aquariums before spraying. Do not use on puppies or kittens under 12 weeks. Consult a veterinarian before using this product on debilitated, medicated, aged, pregnant or nursing animals.

Cover animal's eyes with hand and with a firm fast stroke, to get a proper spray mist, spray head, ears and chest until damp. With fingertips rub into face around mouth, nose and eyes. Then spray neck, middle and hindquarters, finishing legs last. For best penetration of spray to the skin, direct spray against the natural lay of the hair. On long haired dogs and cats, rub your hand against the lay of the hair, spraying the ruffled hair directly behind the hand. Make sure spray thoroughly wets ticks. Do not repeat treatment for 3 to 5 days.

Puppies and Kittens: Spray only along back on your finger tips and rub into coat.

Pet Sleeping Quarters: Spray around baseboards, windows, door frames, wall cracks and local areas of floors. Repeat as needed. The bedding should be sprayed and then replaced with fresh bedding for best results.

Horses and Ponies: To control stable flies, horse flies, deer flies and face flies, apply to face, legs, flanks, topline and other body areas commonly attacked by these flies. Repeat treatment as needed.

To Control Spinose Ear Ticks and Ear Mites, apply 10 drops to each ear so that it can penetrate wax down to surrounding tissues. Repeat treatment once or twice at 2-3 day intervals.

Free Bonus Ear Cleaner Enclosed. Ear Care for Dogs and Cats. Helps to clean the ears, reduce ear odors and dry the ears.

Two Simple Steps to Reduce Ear Problems:

- 1) First, use Ear Cleaner to clean and help reduce ear odors. Ear Cleaner helps reduce ear odors. Use two or three times a week to keep the ears clean and reduce ear odors. Use before and after bathing, swimming or hunting. Also available in 4 oz., 8 oz., 16 oz. and gallons. Fill the ear canal with Ear Lotion. Gently massage the base of the ears. Use facial tissue or cotton to clean the ears.
- 2) Next, use Drying Ear Creme and Flea & Tick Killer to keep the ears dry and control any ear mites or ear ticks present. Use after the ears are cleaned with Ear Cleaner. This unique liquid and dry phase creme will dry to a powder to help keep the ears dry and keep Ear Mites and Ear Ticks out of the ears. Also available in 1 oz. and 4 oz. size. To control ear ticks and ear mites, apply 10 drops to each ear so that it can penetrate wax down to surrounding tissues. Repeat treatment one or twice at 2-3 day intervals.

The ears of dogs and cats are a frequent source of problems. The long ear canal (see diagram below) allows dirt and wax to build up.

{Diagram of Ear, Head, Ear Canal and Ear Drum}

The heavy drooping ear of some dogs closes off the opening of the ear canal. This prevents proper air circulation and results in a moist odorous ear.

Ear Mites: These are small parasites which crawl in the ear canal of dogs and cats. They chew on the ear and cause scratching, head-shaking, pain and infection. A crusty brownish black material will occur in the ear when mites are present.

Storage: Store in original container in a cool, dry place (preferably locked) inaccessible to children and pets and away from heat or open flame. Protect from freezing. **Disposal:** Do not reuse empty container. Securely wrap original container in several layers of newspaper and discard in trash collection.

**PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals**

CAUTION: Harmful if swallowed or inhaled. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing. Wash skin with soap and water after using. Avoid spraying food or foodstuffs. **Animals:** Avoid contact with animal's eyes. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

First Aid

If Swallowed: Promptly drink one or two glasses of water and contact a physician or poison control center immediately. Give nothing by mouth to an unconscious person. **If Inhaled:** Remove victim to fresh air. Apply artificial respiration if indicated. Contact a physician if needed. **If on Skin:** Immediately remove contaminated clothing and wash affected area with plenty of water. Contact a physician if irritation persists. Wash clothing prior to reuse. **If in Eyes:** Immediately flush eyes with plenty of water. Contact a physician if irritation persists.

Environmental Hazards

This product is toxic to aquatic organisms. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

In case of questions or emergencies, call 770-454-3200.

R-7® Ear Cleaner

Two Simple Steps to Reduce Ear Problems
Directions:

1. R-7® Ear Cleaner - Use two or three times a week to keep the ears clean and reduce ear odors. Use before and after bathing, swimming or hunting. Fill the ear canal with R-7® Ear Cleaner. Gently massage the base of the ears. Use facial tissue or cotton to clean the ears.
2. R-7M Drying Ear Creme & Ear Mite Treatment - Use after the ears are cleaned with R-7® Ear Cleaner. The Drying Ear Creme will dry to a powder to help keep the ears dry and the Ear Mite Treatment keeps ear mites and ear ticks out of the ears.

CAUTION: Keep out of reach of children. Avoid contact with eyes or mucous membranes. If eyes are contacted, wash with water immediately. **Do not use on infected ears, especially if there is an open wound. Contact a veterinarian if irritation develops or if an allergic reaction is suspected.** Harmful if swallowed.

First Aid (Human): Call a physician or poison control center.
