DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE ONLY IN A WELL VENTILATED AREA

CATS & DOGS: Cover animal's eyes with hand and with a firm fast stroke spray head, ears and chest until damp. With finger tips rub into face and around mouth, nose and eyes. Then spray neck, middle and hind quarters, finishing the legs last. For best penetration of spray to the skin, direct spray against the natural lay of the hair. On long hair dogs, rub your hand

against the lay of the hair, spraying the ruffled hair directly behind the hand. Make sure spray thoroughly wets ticks. Repeat treatment as needed.

PUPPIES & KITTENS: Treat same as cats and dogs except nursing puppies and kittens, spray only along back or spray onto finger tips and rub into coat.

PETS' SLEEPING QUARTERS: Spray around baseboards, windows, doorframes, wall cracks and local area of floors. If mosquitoes, gnats or flies are present spray lightly into air. Repeat as needed. Pets' bedding should be sprayed, making sure the area beneath the bedding is sprayed too. After spray has dried remove old bedding and replace with fresh bedding.

HORSES: To control stable flies, horse flies, deer flies and face flies apply to face, legs, flanks, top line and other body areas commonly attacked by these flies. Repeat treatment as needed. Do not use on horses or foals intended for slaughter.
