**DIRECTIONS FOR USE**  
**GENERAL CLASSIFICATION**

This is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SPA-PILL 5 Algaecide is used to control the growth of algae in outdoor heated pools, whirlpools, spas and hot tubs. For maximum effect, remove tanks containing heavy algae growth should be cleaned prior to using SPA-PILL 5 Algaecide.

The algaecide is released slowly and constantly, directly into the water circulating system. The pump should be in operation during the use of SPA-PILL 5 Algaecide for at least several hours after the capsule is introduced, and daily.

Remove SPA-PILL 5 Algaecide from the skimmer or strainer basket or tank when the capsule is expended, as indicated by the complete disappearance of the yellow color. Dispose of the capsule as instructed below.

**DOSAGES:** For tanks having just visible algae growth, use 1 to 2 capsules per 1,000 gallons of water. For initial treatment of freshly cleaned or newly filled tanks, use 1 capsule per 1,000 gallons of water. To maintain tanks free from visible algae growth, use 1 capsule per 2,000 gallons of water, after initial treatment.

Remove algae debris from the filter by regular rinsing or backwashing.

SPA-PILL 5 Algaecide is compatible with those chemicals normally used to treat pools, spas and hot tubs, and is effective at both acid and alkaline pH. SPA-PILL 5 Algaecide can be used in tanks treated with chlorine chemicals, and may reduce the amount of those chemicals normally required. Do not mix SPA-PILL 5 Algaecide with concentrated dry or liquid chlorine products.

**STORAGE AND DISPOSAL**

Store SPA-PILL 5 Algaecide in a safe place. Do not pierce the capsule until ready to use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not reuse the SPA-PILL 5 capsule after the algaecide is expended. Dispose of the capsule in an approved landfill, or bury it in a safe place away from water. Open dumping is prohibited.

Other SPA-PILL water treatment capsules are available singly or in kits. For best results, use only one type of capsule at a time.

SUPPLEMENTAL LABELING

"KLOBEN"  
NEBURON WEED KILLER  
FOR SELECTIVE CONTROL OF WEED SEEDLINGS IN TOMATOES

Du Pont "Kloben" Neburon Weed Killer is recommended for selective weed control in established tomatoes grown in areas east of the Rocky Mountains. "Kloben" controls germinating annual weeds and grasses such as lambs'-quarters, purslane, pigweed, smartweed, jimson weed, galinsoga, crabgrass, barnyard grass and foxtail. Established weeds should be removed by cultivation before application of "Kloben".

**WHEN TO APPLY:** For control of weeds in the tomato row, apply "Kloben" after tomato plants are well established in the field (at least two weeks after transplanting) but before vining begins. For control of weeds between the rows, application may be made as late as lay-by time; but, do not apply after fruit begins to form. Do not apply more than once in a season.

Best results are obtained if the herbicide is moved into the soil by moisture (rainfall or sprinkler irrigation) shortly after application.

**HOW TO APPLY:** Apply 6 to 8 lbs. of "Kloben" per acre (of area actually sprayed) with a properly calibrated, fixed-boom power sprayer, using sufficient water (minimum 40 gallons per acre) to provide thorough and uniform coverage of the ground. Use the higher rate on heavier soil types (those high in clay or organic matter). Direct spray to cover soil beneath tomato plants, avoiding contact with crop plants (shields on nozzles may be helpful). If desired, area between rows may be sprayed also. Applications after vining begins should be made only between rows. Do not cultivate or otherwise disturb soil after application, as efficiency may be reduced and/or crop injury may result. Continuous agitation as directed on container label is required to keep material in suspension.

**NOTE:** Do not replant treated areas to any crop within 1 year after last application as injury to subsequent crops may result.

IMPORTANT

BEFORE USING "KLOBEN", READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.
