

43662-8835 PM17 1/1

GENERAL DIRECTIONS:

Apply so as to give total coverage to all parts of tree. Thorough drenching of trunks, limbs, twigs and leaves is essential for maximum insect control.

Use only in spray machines with powerful positive agitation. Keep agitator running at all times during spray operations. OC'S Brand Special Emulsive Spray Oil is formulated as a "fast break" spray oil and will not stay in solution unless agitated constantly.

Directions for Use — High Gallonage, Full Cover Sprays:

Rates given are for 100 gallons of water. Fill spray tank with 1/2 the required amount of water. Start agitator. Add total amount of spray oil. Continue operation of agitator while adding balance of water and while spraying.

APPLES, ALMONDS, APRICOTS, CHERRIES, NECTARINES, OLIVES, PEACHES, PEARS, PLUMS, PRUNES, WALNUTS; DORMANT or DELAYED DORMANT applications apply 1-2 gallons per 100 gallons of water; SUMMER APPLICATIONS apply 1-1.2 gallons per 100 gallons of water for control of San Jose scale, brown apricot scale, Italian pear scale, perlatoria scale, oleander scale, pear psylla, and mites. Pears—do not apply within 30 days of harvest.

GRAPES, DORMANT, DELAYED DORMANT, OR SUMMER APPLICATIONS: Apply 1 gallon plus 1 qt. Parathion 4E per 100 gallons of water for control of leafy bug.

DORMANT, DELAYED DORMANT, OR SUMMER APPLICATIONS:

ALMONDS, APPLES, APRICOTS, CHERRIES, NECTARINES, OLIVES, PEACHES, PEARS, PLUMS, PRUNES, WALNUTS; Apply 5-6 gallons per acre for control of San Jose scale, brown apricot scale, Italian pear scale, perlatoria scale, oleander scale, pear psylla, and mites. Pears—do not apply within 30 days of harvest.

Use Designated Amount in 100 Gallons of Water Unless Otherwise Noted:

Ground Applications: Deciduous Fruits 150-800 gal. per acre. On young fruit plantings use a minimum of 15 gal. per acre. Where recommended for Air Application on orchard crops 10-20 gal. per acre.

NET CONTENTS — 30 GALLONS

CAUTION: For foliage applications, the spray tank must be free of any sulphur residue before using OC'S Special Emulsive Spray Oil. Do not combine Sulfur sprays with OC'S Special Emulsive Spray Oil and do not follow a previous application of sulfur or apply sulfur following OC'S Special Emulsive Spray Oil until sufficient time has elapsed for safety (about 30 days). If in doubt, spray a portion of one tree previously treated with sulfur, using 1 quart to 25 gals. water. If sufficient time has not elapsed, burn will show in several days. Do not use OC'S Special Emulsive Spray Oil when temperatures are above 99 Fahrenheit.

NOTICE: The use of this material being subject to conditions beyond their control, neither ORANGE COVE AG-CHEM nor the seller make any representation or warranty, expressed or implied, with respect to results from such use, whether or not used in accordance with directions. The buyer accepts and uses this material subject to these terms and shall not hold either OC Chemicals, Inc., or seller liable for the results of any use of this material. Any buyer not accepting the foregoing terms is requested to return to seller this container unopened and in good condition within five (5) days from date of purchase.
