TECHNICAL DATA SHEET NO. 19

INTERSEPT®

A FUNGISTAT AND BACTERIOSTAT FOR TOPICAL TREATMENT OF AIR FILTERS.

GENERAL INFORMATION

Topical treatment of air filters with INTERSEPT® represents new technology in providing safeguards in the use of these products. We are now able to introduce the antimicrobial agent by topically treating the air filter during the manufacturing process. Once treated, there is no loss of efficacy due to dampness or wear under normal conditions of use for the useful life of the filter.

Air filters containing INTERSEPT® are bacteriostatically and fungistatically effective against a broad spectrum of both Gram positive and Gram negative odor causing bacteria, fungi, and molds.

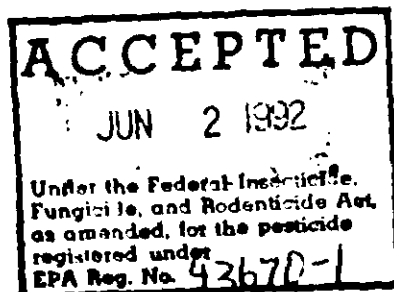

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is intended for use only in connection with manufacturing processes and is not intended to come into the hands of the general public except after incorporation into finished air filters.

Expose air filters to a water emulsion containing INTERSEPT® at a 1-5% concentration and allow to dry.
