GENERAL INFORMATION

Incorporation of INTERSEPT® into carpet backing, epoxy, vinyl, polymeric and fiber systems, and paints, stains and other coating systems represents new technology in providing durable properties throughout the products. We are now able to introduce the antimicrobial agent by formulating it within the chemical matrix during the manufacturing process. Once formulated, there is no loss of efficacy due to washing or wear.

**INTERSEPT®** in carpet backing, paints, stains, coatings, epoxy, vinyl, polymeric and fiber systems is effective as a bacteriostat and fungistat against a broad spectrum of both gram-positive and gram-negative odor-causing bacteria and fungi, including mold and mildew.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is intended for use only in connection with manufacturing processes and is not intended to come into the hands of the general public except after incorporation into finished products, e.g., carpet backing, paints and other coating systems.

Mix **INTERSEPT®** directly into the system formulation at a level from 0.1–5 percent, based on the total weight of all the components of the formulated system.
