Dear Mr. Shen:

Subject: Amendment - Confidential Statement of Formula
(Alternate Formula)
EPA Registration No. 43688-1
Your Letters Dated February 5, 1985, and May 29, 1985

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

Make the following changes at the next printing of your master label:

1. Make dime thyl one word.
2. Add "See Additional Precautionary Statements on right panel."
3. Relocate "Do not contaminate water, food, or feed by storage or disposal" under Pesticide Disposal.
4. Develop storage instructions appropriate to your product.

The Confidential Statement of Formula submitted in support of your alternate formulation has been reviewed and found acceptable.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (TS-767)

Enclosure

For future reference, please note that the above request for alternate formulas since this request does not affect the label text.

Also when submitting labeling do not send additional brand name labels. You need submit only the basic label for review.

GENERAL DIRECTIONS

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. BSD is a ready-to-use insecticide dust which can be applied through the use of self-treating dust bags, or by hand. But do not apply with bare hands. Use dust mitt or other protective gloves.

DIRECTIONS FOR USE:

BEEF CATTLE AND DAIRY CATTLE

For the control of horn flies, and lice, and to aid in the control of face flies.

HAND DUSTING — Apply approximately 2 oz. of dust by shaker can, rotary duster or by spoon to the upper portions of the back, neck and poll, and to the face as an aid in the control of face flies. Rub in lightly to carry the dust beneath the hair. Repeat as necessary.

SELF-TREATING DUST BAG-FORCED USE —

Put BSD dust in cotton cloth or double burlap bags or use cattle dust bags and hang in barn door exits or alleyways leading from animal buildings, salt or mineral blocks, or watering holes. Protect cloth or burlap from weather.

FREE CHOICE USE — Use the same dust bags as above but place in loafing sheds, holding pens, feedlots, near water holes or other areas where cattle gather. The free choice aids in the control of lice.

SWINE

For the control of lice

HAND DUSTING — Apply 3-4 oz. of dust by conventional hand or power duster to each animal with special attention given to the neck and around the ears. Repeat as necessary, but not more often than once every 14 days. In severe infestations, both individual animals and bedding may be treated. One lb. of BSD dust should be applied per 150 sq. ft. of bedding.
