DIRECTIONS FOR USE
GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling

DIRECTIONS FOR DISINFECTION OF COOLING TOWER WATER

For the control of bacteria, algae and fungi, add this sodium hypochlorite solution to the tower basin, distribution box or some other point to insure uniform mixing

INITIAL DOSE: When the system is noticeably fouled, application of ½ pint – 1 pint (8-16 oz.) of this sodium hypochlorite solution per 1,000 gallons of water in the system will achieve 7.5 – 15.0 ppm available chlorine by weight. If necessary, repeat procedure until control is achieved.
SUBSEQUENT DOSE: When microbial control is evident, application of ¼ pint – ½ pint (4-8 oz.) of this sodium hypochlorite solution per 1,000 gallons of water in the system will achieve 3.25 – 7.5 ppm available chlorine by weight. Apply treatment weekly or as needed to maintain control. Badly fouled systems must be cleaned before treatment is begun. This sodium hypochlorite solution weighs 10.2 lbs. per gallon.

DIRECTIONS FOR SANITIZING FOOD PROCESSING OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using rinse all surfaces thoroughly with this sodium hypochlorite solution containing 200 ppm available chlorine. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of one fluid oz. (2 tblsps.) of IPC 8945 per 5 gallons of water will provide approximately 200 ppm available chlorine by weight.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER

Corrosive may cause severe skin irritation or chemical burns to broken skin Causes eye damage Do not get in eyes on skin or on clothing Wear goggles or face shield and rubber gloves when handling this product Wash after handling Avoid breathing vapors Vacate poorly ventilated areas as soon as possible Do not return until odors have dissipated

ENVIRONMENTAL HAZARDS This pesticide is toxic to fish Keep out of lakes streams or ponds Treated effluent may not be discharged into lakes streams ponds or public waters without a valid discharge permit For guidance contact the regional office of the Environmental Protection Agency

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT Mix only with water according to label directions Mixing this product with gross filth such as feces urine etc or with ammonia acids detergents or other chemicals may release hazardous gases irritating to eyes lungs and mucous membranes

FIRST AID If on skin wash with plenty of soap and water If in eyes flush with water for at least 15 minutes Get medical attention If swallowed drink large quantities of milk or gelatin solution or if these are not available drink large quantities of water Do NOT give vinegar or other acids Do NOT induce vomiting Get prompt medical attention

STORAGE AND DISPOSAL:

Store in a cool dry area away from direct sunlight In case of spill floor area with large quantities of water Rinse empty container thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landfill Product or rinsate that cannot be used should be diluted with water and disposed of in a sanitary sewer Do not contaminate food or feed by storage disposal or cleaning of equipment
