DIRECTIONS FOR SWIMMING POOL CHILDRING YION
Social William (Is spring start-up, superchlorinate with one (I) sint (IS flu. OZS.) of
sodium hypochlorite solution for each 3000 gallons of water. This dosage is equivalent
to 5 ppm available chlorine by weight.
For Pool Maintenance

Sections 1990 Fig. 1991 of each 3000 gallons of water. (1) sint (16 flu. 023.) sodium hypochlorite solution for each 3000 gallons of water. It is dosage is eduvation to 5 ppm svailable chlorine by weight.

For Pool Maintenance

A) Adjust pool water pH to 7 6 - 7 2 range and maintain

B) Add manualty or by a feeder device this sodium hypochlorite Solution at a rate to maintain an available chlorine residual of 0.6 to 1.0 ppm. Disp fourth pint (4 flu. 023.) of this sodium hypochlorite solution for each 4000 gallons of water wellings wide 10 ppm available chlorine by weight. Frequency of admittens to maintain 0.6 to 1.0 ppm available chlorine will depend on temperature and number of sammers. Use test kit to make certain the pH and chlorine residual around the proper range.

DIRECTIONS FOR DISINFECTION OF POTABLE WATER FOR HOME WELL WATER SYSTEMS

FOR HOME WELL WATER SYSTEMS

Dilute this sodium hypochlorine solution in the ratio of onepart sodium hypochlorine solution to 11 parts softemed water. Mix sodium hypochlorine less this softemed water. Mix sodium hypochlorine with the distribution system, as determined by a DPD chlorine test kir. Bacteriotogical sampling must be conducted at a frequency no less than that prescribed by the National Interim Primary Drinking Water Regulations. Check water frequently with a DPD chlorine test kir.

Contact your local testiful Department for further details.

DRECTIONS FOR SANITIZING FOOD PROCESSING

Contact your local retain Department for surfer detain.

DIRECTIONS FOR SANITIZING FOOD PROCESSING
OR DAIRY EQUIPMENT

Clean equipment in the normal manner. Just before using, rinse all surfaces thorough y with this sodium hypochlorite solution containing 200 ppm available chloring. Maintain contact with disinfectant for a minimum of two minutes. Do not rinse with water after treatment with sodium hypochlorite solution. Do not soak overnight. Addition of one fluid oz. (2 tblsps.) of this sodium hypochlorite solution per 5 gailons of water will provide approximately 200 ppm available chlorine by whight. NOTE: This product degrades with age. Use a chiorine test art and increase dosage, as necessary, to obtain the required level of available chloring.

STORAGE AND DISPOSAL: Storainacool dry area away from direct sunlight. In case of apul, flood croa with large quantities of water. Rinse empty confainer thoroughly with water and either return to manufacturer or discard by placing in trash collection or burying in an approved landful. Product or insate that cannot be used, should be diluted with water and disposed of in a sanitary sewer. Do nate food, or feed by storage, disposal or cleaning of equipment
