

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)  
CAUTION**

Read the entire label before using. Use only as recommended for claims listed. During commercial exposure in seed treatment and loading operations, wear goggles, clean synthetic rubber gloves, protective clothing, and a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration (formerly the U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of 30 CFR part 11.

Wash hands, arms, and face thoroughly with soap and water after handling and before eating or smoking. Routinely shower or bathe after work and wash all clothing with soap and hot water before reusing.

**ENVIRONMENTAL HAZARDS:**

This product is toxic to fish. Keep out of any body of water. Do not contaminate water by cleaning of equipment or disposal of wastes. Bury wastes and empty containers in isolated area away from water supplies.

**DIRECTIONS FOR USE  
AND RECOMMENDATIONS:**

It is a violation of State and Federal Law to use this product in a manner inconsistent with its labeling.

Read all directions before using and use only as specified on this label.

**DIRECTIONS:** Thoroughly mix the recommended amount of Captan-Methoxychlor 300-20 Flowable Seed Protectant into the required amount of water for the slurry treater equipment and dilution rate to be used. Clean equipment thoroughly between treating operations.

**SPECIAL USE PRECAUTIONS:**

**IMPORTANT:** Treated seed must not be used for human consumption nor as animal feed. Bags containing treated seed should be labeled.

**TREATED SEED**

**DO NOT USE FOR FEED, FOOD, OR OIL PURPOSES**

THE Federal Government and some states have issued regulations for the application of special tags or labels to be affixed to bags containing treated seed. Dispose of excess treated seed by burial.

**PRODUCT INFORMATION:**

Captan-Methoxychlor 300-20 Flowable Seed Protectant is a liquid suspension that is especially formulated for the treatment of seed prior to storage and planting to protect seed from molds and other fungi causing storage loss and to protect seed from seed-borne and soil-borne fungi which cause seed decay, damping-off, and seedling blights. Also for protection of stored seed against Cadelle, confused flour beetle, flat grain beetle, granary weevil, lesser grain borer, red flour beetle, rice weevil, and saw-toothed beetle. At the recommended dosage Captan-Methoxychlor 300-20 Flowable Seed Protectant is noninjurious to seeds or seedlings and the germination of treated seed is frequently stimulated, giving a superior result as compared to results from untreated seed.
