**ONLY SEED OF HIGH GERMINATION** with good vigor should be treated with Lindane. Poor seed may suffer greater injury. It is suggested that seed be treated not over six weeks before planting. What effect prolonged storage has on germination has not been definitely established. Treated seed should be stored in a dry place until planted so that excess moisture may evaporate. If seed is stacked when wet, heat may develop which impairs germination.

**IF SOIL TEMPERATURE IS EXTREMELY HIGH** due to hot weather, mid-summer planting, or other reasons, reduce recommended dosage by one-half. Where seed decay occurs due to soil organisms combine with a protective fungicide.

### STORAGE AND DISPOSAL:

- PROHIBITIONS:**—Do not contaminate water, food or feed by storage or disposal.— Open dumping is prohibited.
- PESTICIDE DISPOSAL:** Pesticide spray mixture or residue that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies.
- CONTAINER DISPOSAL:** Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill or bury in a safe place.
- GENERAL:** Consult Federal, State, or local disposal authorities for approved alternative procedures.
