### PRODUCT INFORMATION

**MANEB 50 PLANTER BOX SEED TREATER** is a dust base agricultural fungicide especially formulated for seed treatment at planting time. This product is formulated to help lubricate the planter box and assure a smooth, even seed flow to the furrow. It is formulated for use in the treatment of seed for protection against stinking smut (bunt) of wheat, oat smuts, covered and false loose smuts of barley and seed decay.

### DIRECTIONS

Read all directions and use only as specified on this label. Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not store excess treated seeds beyond planting time. **MEASURING SCOOP IS ENCLOSED.** One level scoop holds approximately one ounce.

**FOR IMPROVED MIXING OF PRODUCT WITH SEED,** it is recommended that the seed be premixed in a suitable container with the product, then transferred to the planter box. Similar results may be obtained by filling the planter box half full of seed, then adding half the required amount of product, followed by thorough mixing with a stick and finally, the second half of seed and product; repeating the mixing.
