## GENERAL INFORMATION

This product is especially formulated for planter box or drill box application to seeds listed. Protection is provided against seed-borne and soil-borne fungi which cause seed decay, damping-off, and seedling blights. It contains a non oil lubricant to help lubricate the planter box and assure a smooth, even flow to the furrow.

## DIRECTIONS FOR USE

(Rotary Drum or Small Container) - Fill unit not more than 1/2 full; add correct amount of Thiram; rotate slowly until product is evenly distributed on all seed.

(Planter or Drill Box) - Place 1/2 the total amount of seed and Thiram in box & mix with paddle or stick. Add remaining 1/2 of seed and Thiram and stir as specified above.

Treat peanuts promptly after shelling. Other seeds may be treated anytime after being well cured.

Gladiolus Bulbs - Treat after drying by thoroughly coating bulbs with Thiram by shaking in a paper bag or similar device.

## IMPORTANT:

Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not store excess treated seeds beyond planting time.
