### PRODUCT INFORMATION

This product is especially formulated for planter box application to soybeans and certain other listed legumes. Protection is provided against seed-borne and soil-borne fungi which cause seed decay, damping-off, and seedling blights. It also provides Molybdenum which is essential to the nitrogen-fixing nodule bacteria, and is formulated with a non-oil lubricant to help lubricate the planter box and assure a smooth, even flow to the furrow.

### DIRECTIONS FOR USE

Place 1/2 the total amount of seed in planter or drill box, add 1/2 the required amount of this product, and mix thoroughly with a stick. Add the remaining 1/2 of seed and product and mix as above.

**SOYBEANS:** Use 2 oz. per bushel, or 3.3 oz. per 100 pounds of seed.

**ALFALFA, CLOVER, & OTHER SMALL SEEDLING LEGUMES:** Use 11.4 oz. per 100 pounds of seed.

### IMPORTANT:

Treated seed must not be used for or mixed with food or animal feed, or processed for oil. Treat only those seeds needed for immediate use, minimizing the interval between treatment and planting. Do not store excess treated seeds beyond planting time.

### NOTICE — READ CAREFULLY

**CONDITIONS OF SALE:** Seller(s) offer(s) this product for sale subject to, and buyer and all users are deemed to have accepted, the following conditions of sale and warranty which may only be varied by written agreement of a duly authorized representative of Seller(s).
