DIRECTIONS FOR USE

To prevent wood rot and decay and to control adhesion and penetration of mushroom mycelium in timber trays and benches add 19.5 fl. oz. of SAFETRAY™ P to 25 gal. of water to achieve a treating concentration of 1,500 ppm active ingredient.

MIXING

Half-fill the spray tank with water. Add the appropriate amount of SAFETRAY™ P. Triple rinse empty container and add the rinsate to the tank. Stir gently and add water up to the required volume. A few drops of an anti-foam agent may be added to avoid excessive foaming.

APPLICATION

Between each crop of mushrooms, apply the spray solution with a large droplet sprayer on the internal surface of the trays or to the inside surface of the side, end and bottom boards of the benches. To insure complete wetting of the wood surface use approximately 25 gallons of spray solution per 5,000 sq. ft. of wood surface. Make sure all corners are well treated. Let the trays or bench boards dry before adding compost. The trays should be allowed to dry in a sheltered, well-ventilated place.
