

- d. Before releasing this product for shipment, submit a specification sheet on the petroleum distillate you are using, certified limits for the ingredients in your product, and a brief description of the formulation process.
- e. Change the "Pesticide Disposal" statement to "Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility."
- f. Correct the "Container Disposal" statement to read "Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by the procedures approved by State and local authorities."

3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

EPA Est. No.

Pyrenone® General Purpose Spray is an Effective, Fast-Acting Insecticide That Kills the Accessible or Exposed Stages of: ANTS, BEDBUGS, CHEESE MITES, CLOTH MITEs, COCKROACHES, CRICKETS, FLYING MOTHS, FRUIT FLIES, GNATS, HORNETS, HOUSE FLIES, MOSQUITOES, SCORPIONS, SILVERFISH, SPIDERS and WASPS.

and these Common STORED PRODUCT Pests:

Angoumois Grain Moths	Grain Mites	Rice Weevils
Carpet Beetles	Granary Weevils	Rust-red Flour Beetles
Cheese Skippers	Indian Meal Moths	Saw-toothed Grain Beetles
Cigarette Beetles	Meal Worms	Spider Beetles
Confused Flour Beetles	Mediterranean Flour Moths	Tobacco Moths
Drugstore Beetles		

Pyrenone General Purpose Spray is highly useful for insect control in Residences, Institutions, Public Buildings, Hospitals, Hotels, Restaurants, Stores, Theaters, Food Processing Plants, Bakeries, Grain Mills, Dairies, Breweries, Bottling Plants, Warehouses, Trucks and other situations where an insecticide with a high degree of effectiveness is required.

The insecticidal components Piperonyl Butoxide and Pyrethrins are classified as food additives, and when this product is used as directed, allowable tolerance levels will not be exceeded.

ACTIVE INGREDIENTS:

Pyrethrins.....	0.1%
*Piperonyl Butoxide, Technical.....	1.0%
**INERT INGREDIENTS:	98.9%
*Equivalent to 0.8% (butylcarbityl) (5-propylpiperonyl) ether and 0.2% related compounds.	100.0%
**Contains Petroleum Distillate

KEEP OUT OF REACH OF CHILDREN

CAUTION

See rear panel for additional precautions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For maximum insect control, a combination localized surface application and space treatment is recommended.

SPACE SPRAY: For rapid control of house flies, fruit flies, mosquitoes, flying moths and gnats. Close doors and windows and shut off ventilating systems. Use a good sprayer adjusted to deliver a fine mist, directing spray toward the upper portions of the enclosure and filling the room with mist. Use 1/2 to 1 oz. of spray for each 1000 cu.ft. of space. Keep area closed for at least 10 minutes after spraying. Vacate area after treatment and ventilate before reoccupying.

VAPOR SPRAY: Pyrenone General Purpose Spray is effective for its use as a fog or vapor treatment in special electric, air equipment. Use in accordance with manufacturers' directions for each individual type of applicator selected. Dosages vary with conditions, but many such applicators are designed to give most effective results when the material is used at 1 pint to each 8,000 - 15,000 cu. ft. In all cases, dosages should be sufficient to thoroughly saturate the area with fog or vapor. Insects controlled will be the same as those controlled by "Spray" above.

SURFACE SPRAY: To control cockroaches, silverfish, crickets, mites, scorpions, cheese mites, cheese skippers, spider beetles, etc., use General Purpose Spray in a good machine adjusted to deliver a fine mist spray using approximately 1 gal. of material to each 750 sq. ft. Spray infested areas thoroughly and direct the liquid into cracks, crevices, cabinets, shelves, sinks, door and window frames, and dark corners and into cracks, crevices, recesses and other places where insects are hiding.

Against Ant Infestations, treat shelves, cabinets and stairs, baseboards, thresholds and other places where ants are running.

To Control Bedbugs effectively, apply liberally to top, bottom and sides of mattresses, spraying thoroughly all tufts, seams and folds, directing the liquid into all cracks and crevices, under baseboards, moldings, floors, closets, bedroom furniture, etc., with particular attention to protected bedbug hiding places.

To Control Carpet Beetles effectively, apply to floor and baseboards. Spray directly into cracks, crevices and under carpets where they are found. Treat both the underside and top side of infested areas. Inside of trunks, closets and infested areas of shelving.

Stored Grain or Flour Insects: Pyrenone General Purpose Spray is effective in mills, elevators, granaries, warehouses, food storage areas where an effective, fast-acting insecticide is required to control the most exposed stages of: granary weevils, rice weevils, cigarette beetles, carpet beetles, saw-toothed grain beetles, rusted grain beetles, confused flour beetles, Angoumois grain moths, Indian meal moths and grain mites. As a space or vapor spray, it is effective in the control of flying and crawling stages. In cracks and crevices it is effective in the control of grain insects.

For Treatment of Floors and Bins: Pyrenone General Purpose Spray gives initial kill of the accessible stages of most stored product pests listed in the previous paragraph, but gives no protection in cracks and crevices where insects hide. Apply adjusted to deliver a coarse droplet spray using approximately 1/2 pint of material to each 750 sq. ft. of surface. Repeat application as needed.

In mills, elevators and granaries, thoroughly spray floor surfaces of bins, storage and handling areas with particular attention to cracks, crevices and similar protected locations. Waste material should be removed and destroyed and storage areas cleaned. Treat unloading, handling and processing areas and conveyor, processing and handling equipment, the interior of purifier conveyors, sifters, roll housings and hoppers. Spray thoroughly around the bases of heavy machinery.

NET CONTENTS: _____

SEE REVERSE SIDE

For in-transit protection and control, treat truck beds, box cars and ships holds before loading. For extended protection and control in warehouses and food products storages, treat exposed surfaces as recommended above and spray heavily into cracks, crevices, recesses, hiding and breeding areas. Thoroughly treat walls, floors, shelves and other exposed areas, and lightly spray each layer of cartons or containers as stacked.

AS A CONTACT SPRAY: Pyrenone General Purpose Spray is also very effective when used as a contact spray against mosquitoes, gnats, wasps, hornets, skippers, scorpions and cheese mites. When these insects are present, contacting them with a fine mist will provide immediate kill. Spraying walls, ceilings, lights, moldings, screen doors and door frames, beams and light cords will make these locations unfavorable as resting or hiding places for these insects.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL: Pesticide, spray mixture or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal, State or local procedures.

CONTAINER DISPOSAL: Triple rinse (or equivalent) then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved State and local authorities.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Do not breathe spray mist. Wear a mask or respirator of a type recommended for protection against this type insecticide. Wear protective clothing. Wash exposed skin surfaces with soap and water after handling and before eating or smoking. Wash all contaminated clothing with soap and hot water before reuse. Remove pets, birds and cover fish aquaria before spraying.

Do not apply as a space spray while food processing is underway. Except in Federally inspected meat and poultry plants, when applied as a surface spray with care and in accordance with the directions and precautions given above, food processing operations may continue. Foods should be removed or covered before treatments. In food processing areas all surfaces must be washed and rinsed with potable water after spraying.

When using in animal quarters, do not apply directly to food, water or food supplements. Wash teats of dairy animals before milking.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Contact a physician or Poison Control Center immediately. Do not induce vomiting unless directed by a physician. Vomiting may cause aspiration pneumonia.

If Inhaled: Remove affected person to fresh air. Apply artificial respiration if indicated.

If In Eyes: Flush affected areas with plenty of water. Contact a physician if irritation persists.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Shrimp and crabs may be killed at application rates recommended on this label. Do not apply where these are important resources.

Buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith.
